

THE BLAIRMORE ENTERPRISE

VOL. XIII, NO. 43.

BLAIRMORE, ALBERTA, THURSDAY, OCTOBER 26, 1922.

\$2.00 YEARLY

AN EXTRAORDINARY

TREAT IN STORE
A real treat is in store for those who can make it possible to attend the evening service at the new Bellevue Community hall on Sunday, November the 5th.
The preacher will be the Rev. Dr. Alberta. Mr. Powell will be greeted by A. S. Tuttle, of MacDougall Methodist church, Edmonton. Dr. Tuttle stands foremost among Western Canadian orators and is worth hearing.
The preacher both morning and evening of Sunday next will be the Rev. Thomas Powell, superintendent of Methodist missions for Southern Alberta. Mr. Powell will be greeted by large and interested audiences.

Convert Your Victory Bonds

The Minister of Finance offers to holders of Canada's Victory Bonds issued in 1917 and maturing December 1, 1922, the privilege of exchanging the maturing bonds for new bonds, bearing 5 1/2 per cent. interest and maturing in 5 or 10 years. A bonus of a full month's interest will be given to those who avail themselves of the conversion privilege not later than September 30.

WE WILL ARRANGE TO CONVERT YOUR BONDS WITHOUT CHARGE

DEATH OF JAMES CALLAN

Word was received yesterday at the death of James J. Callan, which occurred at Vancouver, following a long illness. Mr. Callan has been suffering from cancer of the throat and the end was not unexpected. He was about forty-six years of age and leaves a wife and two children, residing at Bellevue, where Mrs. Callan is proprietress of the Bellevue boarding house.

Mr. Callan was one of the great old timers of this district, having come to Bellevue some fourteen years ago where he for a number of years ran the Bellevue hotel. Since the destruction of the hotel by fire a few years ago, he has held a position at the Bellevue mine of the West Canadian Collieries.

He was of a most cheerful and kindly disposition, and the news of his death will be received with profound regret by his numerous friends.

The remains will arrive at Blairmore Saturday morning and will be conveyed to St. Cyril's church, Bellevue, where a general Mass will be held at 9 a.m., and Libera at 2 p.m. sharp, after which the procession will proceed to Blairmore, where interment will take place in the Catholic cemetery, Rev. Father Cosman officiating.

Mrs. Callan had just returned from a visit to her husband when she received word of his death.

ODDFELLOWS' BALL

The local lodge of the Independent Order of Oddfellows will hold their annual ball at the opera house on Friday night of next week, and the committee in charge promise the best time ever. The hall will be specially decorated for the occasion with balloons, etc., and good floor, good music and a good time is guaranteed.

COUNCIL PROTESTS UNREASONABLE RELIEF DEMANDS

The regular meeting of the town council on Monday night was attended by Mayor McLeod, Councillors J. A. McDonald, Owen Morgan, W. McVeigh and Alex. Morency, and Secretary Wright.

The minutes of previous meeting were duly approved and the following accounts passed for payment, subject to approval by committee: Petty cash \$25.00, J. Howe \$47.00, G. Lang \$47.00, Blairmore Board of Trade (half annual expenses delegate to Lethbridge) \$6.00, Provincial Supplementary Revenue Tax \$412.00, Blairmore Enterprise \$22.80, Burgess Adding Machine Co. \$3.95, Blairmore Exchange \$10.30, Alberta Government Telephone \$10.30, P. Barstoll \$12.40, West Canadian Collieries \$5.50, Henry Walter \$0.00, Northern Electric Co. \$63.35, Canadian General Electric \$35.65, October Salaries \$76.00, A. Battel \$12.55, L. Malara \$46.00.

A bill from John Kubic was found to have been paid in 1917.

Among the communications the most interesting was that from the Department of Attorney-General, demanding immediate settlement of the sum of \$3932.85, claimed as due the province under the Mothers' Allowance Act and the Children's Protection Act in connection chiefly with the children of one Peter Mancini. The portion accrued in connection with the Mancini children is about \$3100.00, the balance being mostly connected with relief claims of Mrs. Nicholson, Mrs. Therg, Mrs. Stafford and Mrs. Jarvis.

Absolutely no objection is raised against the claims of the two former, the allowance being recommended by Mr. Wright, the local commissioner under the Acts and endorsed by the council; but circumstances surrounding the other two applicants do not seem to make their claims justifiable and the council desired to enter strong protest to such recommendations. The recommendation on the part of Mrs. Jarvis was made by the commissioner at Lethbridge. Mrs. Jarvis is at present in the employ of the government under the Children's Protection Act, caring for several children at Lethbridge. She at one time, conducted a rooming house in Blairmore and at the time application was made to the local commissioner, Mrs. Jarvis could not be recommended. It appears that in spite of the disapproval registered by the local commissioner and the council, the provincial department undertook to make monthly allowances and now the town is faced with demand for repatriation. The letter from the deputy attorney general states in part that in the event of not hearing immediately, there would be no alternative but to place the claim in the hands of the Department's solicitor, with instructions to issue writ.

Secretary Wright informed the council that provision was made in the estimates for this year for one thousand dollars, which was thought would cover any demands under the Relief Acts in question.

The secretary was instructed to write the department, entering protest on behalf of the town.

On motion by Morency—McDonald, a grant of \$100 was made to the Arena, with special instructions as to allotment.

A very encouraging statement for the month of September was submitted by the secretary, showing a good surplus in all departments.

A communication from the local Chapter of the I.O.G.E. was read, asking co-operation of the town council towards an Armistice Day Celebration. The secretary was instructed to reply, stating that a committee from the Council would meet a committee from the I.O.G.E. at any time they may set.

Dr. Olivier was appointed medical

PICCARELLO TRIAL

ON NOVEMBER 27

We understand that the date of the Piccarello and Lissandro trial has been set by the attorney-general to take place on Monday, November the 27th, at Calgary.

BIG CAPTURE EFFECTED

ON TUESDAY AFTERNOON

For some time the A. P. P. and the R. C. M. P. have been on vigilant look out for a still believed to be in operation within the boundaries of Blairmore and on Tuesday afternoon a warrant was issued for the search of the residence premises of an Italian named Lodo, located in a corner of the Pelletier addition.

Here was found a complete equipment for the manufacture of fermented wines and strong liquors. The apparatus was taken in charge, as well as finished product in the shape of about 200 gallons of wine and fifty gallons of whiskey. Lodo was taken into custody and placed behind the bars to await trial this afternoon.

health officer for the half year ending December 31st at a fee of \$125.00.

TOURIST ASSOCIATION

The annual meeting of the Tourist Association of Southeastern British Columbia and Southern Alberta was held at Fernie on October the 18th, and was attended by representatives from Lethbridge, Cranbrook, Nelson, Pincher Creek, Windermere and Fernie. At the meeting it was unanimously decided to carry on for another year, all being prepared to accept their assessments. Fred Spalding was reappointed commissioner and his plans for 1923 were accepted in full.

These plans call for an issue of at least 20,000 large maps with brief descriptive matter and a few illustrations, table of distances and a hotel and garage list on the reverse side. A small amount of newspaper advertising and what other means the commissioner thinks will bring results, same to be kept within a total expenditure of five thousand dollars.

The most notable feature of the meeting was that such go-ahead towns as Coleman and Blairmore were not represented.

The present attempt of the United States to "dry" up the oceans is going to be some job.

A Bright Outlook

National pride and confidence in Canada should be cultivated by every Canadian citizen whether native-born or Canadian by adoption. There is every reason why Canadians should be proud of and have confidence in their country, and those reasons are never more evident than during the period which has elapsed since the war, and as time passes they are becoming clearer and stronger.

Few countries, if indeed any, quite so successfully navigated the first two or three years after the Armistice. Canada had its financial worries, its industrial depression, its strikes, but these were in every respect less severe than in other countries. In fact, but for several years of repeated crop failures over considerable areas of the prairie provinces, which intensified the financial problem and because of reduced buying power operated to increase unemployment and thereby encouraged a feeling of unrest, it is doubtful if Canada's industrial depression and labor unrest would have been very noticeable. The Dominion, however, passed through the first and most difficult years of the after-war reconstruction period with ease, when compared with other countries.

Conditions in Canada are now steadily improving, and our position both nationally and individually is full of promise. Striking proof of the growing confidence of Canadians in their own Dominion was shown in connection with the recent Convention of the Federal Government when present holders of maturing Victory Bonds took advantage of the offer to exchange the same for a new issue so generally that practically the full amount was thus provided for and the Minister of Finance will not be obliged to rely upon foreign capital. Canadians have thus demonstrated that, not only were they willing to purchase their country's securities to win the war, but they are just as willing to buy such securities in time of peace.

Of all national currencies which went to a heavy discount in the United States during and immediately following the war, the Canadian dollar was the first to recover and get back to par.

The trade of Canada is steadily expanding, and doing so in the most healthy fashion. That is to say, the marked increase in the total trade of the Dominion being noted from time to time equists almost entirely of an increase in export trade. Imports are remaining stationary or slightly decreasing, thus showing that the Dominion is becoming more and more self-contained and reliant, while its credit rises throughout the world. More and more Canada is attracting capital and drawing gold from other lands, while at the same time we are obliged to send less money out of the country to meet international obligations.

A wonderful impetus to this movement will undoubtedly result from this year's bumper crop in the West—the largest, it is now said, in the history of the Prairies, and even greater in volume than the record breaking crop of 1915.

The deficit in the operation of the National Railways is steadily decreasing, and while it may take some years yet to place that great system in a position where it will be able to pay all its fixed charges, the day is approaching when it will more than earn its operating expenses and leave a small surplus to apply on capital charges. There is a growing feeling of optimism regarding the road's future.

Building operations throughout the Dominion this year have reached a total only comparable with some of the best pre-war years, and in all lines of industrial activity there is a marked increase in business and a consequent lessening of unemployment. In fact, the report from some of the Western labor bureaus is now to the effect that there are more jobs offered than there are applicants for them.

Debt liquidation is proceeding apace and a stronger, healthier financial situation steadily is developing. There is nothing of a boom in evidence, and certainly no one having the best interests of the Dominion at heart desires to see anything of that nature develop. There is, however, a sane, substantial betterment taking place, and all indications point to a continuance of this throughout the coming year.

Apart from its debt paying possibilities, the chief value of the 1922 Western crop is in the restoration of confidence among thousands of people who, it must frankly be admitted, were becoming somewhat discouraged. While the bountiful yields this year are an exception to the rule, they have also demonstrated that the very lean years recently experienced are also an exception. More normal times are ahead, and with renewed confidence the Canadian people can with their usual average ability and energy build a prosperous future for themselves and their country.

PAINS IN BACK AND SIDES

Relieved by Lydia E. Pinkham's Vegetable Compound

Lindsay, Ontario.—"I used to have very bad pains in my back and sides, and often, when I was not fit to do my work, I tried many medicines before I began to take yours. Now, Lydia E. Pinkham's Vegetable Compound, advertised in the *Montreal Globe* and now that it has helped me I recommend it to all of my neighbors. I keep it in the house all the time and take it once in a while no matter how well I feel, for one ounce of prevention is worth a pound of cure."
—ELIZABETH CAMPBELL, 13 St. Paul St., Lindsay, Ontario.

To do any kind of work—and you know there is much to be done—is next to impossible if you are suffering from some form of female trouble. It may cause your back to ache or a pain in your side; it may make you nervous and irritable; you may be able to keep up and around, but you do not feel good.
Lydia E. Pinkham's Vegetable Compound is a medicine for women. It is especially adapted to relieve the cause of these troubles, and restore them to normal health.

John Bull and Uncle Sam

Small Peoples of the World Learning to Look to Britain for Justice
The United States has expressed, through a newspaper interview given out by Secretary Hughes, its sympathy with Britain's demand that the Dardanelles shall be proposed wide open to the shipping of the world.

Yet the United States, as one of the great powers, has done nothing apparently to cause its views in this matter to prevail. Like France and Italy, the United States knows that Britain will not again allow the Turk to bestride the Straits. It is rather touching to observe how cordially the United States leaves its foreign entanglements on the doorstep of John Bull, expecting him to keep things straight. The charity dispensed throughout distressed Europe and Asia by the United States is great work well done. But all the small oppressed peoples are made to know that it is Charity only and not Justice which Uncle Sam has to dispense.

The small peoples of the world are learning that if it is charity they want they should appeal to the rich Uncle Sam. If it is justice they want they must see if John Bull can do anything for them.—Toronto Star.

Manslaughter in 2nd Degree

Using a razor—bad stuff—but many people do it for their corns.
Putnam's Corn Extremator, which does remove warts and corns, cleans them right off. Refuse a substitute for "Putnam's," 25c everywhere.

Oldest U.S. Strike Ends

Started in 1888, Is Terminated by Death of Striker

The oldest strike in the United States is ended and the striker, Albert M. Parnotto, is buried. Parnotto went on strike in 1888 when he was pilot of an old wood-burning engine on the Chicago, Burlington and Quincy, and he never gave it. He continued to draw strike pay until his death. At his funeral, 400 members of his union, the Brotherhood of Locomotive Engineers, and a delegation of striking shopmen, followed his body to the grave.

DIARRHOEA IS DANGEROUS To Teething Babies DURING HOT WEATHER

Hot weather is a dangerous time for the babies when cutting their teeth, and all mothers should watch very closely when they have and if possible, if it is with the greatest of confidence.

"Mrs. James E. Green, Vermilion, Ala., writes under date of Aug. 18th, 1922, as follows: 'A week ago my baby boy, just one year and four months old, started cutting his teeth, and was so sick he couldn't eat or sleep, and had the diarrhoea most terrible. I had a rectum was raw and bleeding, but after giving him Dr. Fowler's Extract of Wild Strawberry, respired, and after three days he was as well as any boy could be. I wouldn't be without your grand remedy for auld gold.'"

"Dr. Fowler's" is for sale at all dealers; price, 60c a bottle; put up by T. M. Milburn Co., Limited, Toronto, Ont.

Six-Wheeled Vehicles

Load Better Distributed Than on a Four-Wheeled Vehicle

The demand for motor transport transport wagons capable of carrying very heavy loads has led to the design of six-wheeled vehicles in which the load is better distributed than is possible on a four-wheeled vehicle. Several types of six-wheeled vehicles have been developed in Great Britain, and one of the latest shows conspicuous improvements. It may be regarded as a four-wheeled vehicle with a two-wheeled tractor attached. The tractor moves on a turntable attached to the fore end of the wagon proper; and the peculiarity of the new arrangement is that the rear wheels of the wagon are also on a turntable. The result is that when the vehicle goes round the corner the rear wheels follow the front wheels exactly, thus enabling the wagon to be manoeuvred with the greatest possible ease. Even when the vehicle is backed it can be readily manoeuvred in awkward situations. Existing four-wheeled vehicles can be readily converted into the new type, so doubling their carrying capacity at a very moderate expense.

Considering the annoyances of life, a patient man or woman is entitled to a great deal of credit.

Japanese Eat Octopuses
The octopus is highly valued in Japan as an article of food.

A grouch is just liver complaint made vocal.

Dr. Barnardo's Homes

28,889 Boys and Girls Have Been Sent to Canada

The fifty-sixth annual report of Dr. Barnardo's Homes records the important addition to the "mission of rescue" during 1921. These included the William Baker Technical School, Goldings, near Hertford, a new convalescent home for cases of surgical tuberculosis at Folkestone, a new base at Toronto for immigration work in Canada, and three new houses at the boys' garden city at Woodford Bridge.

The emigration of year is described as having been of mutual interest. "Canada has received 506 of our best boys' and girls, bringing up the total of those whom we have sent to the Dominion to 28,889. But Australia has stepped into line as a competitor with Canada. An influential committee has been formed in Sydney. A new home has been purchased and presented to the Barnardo institutions as an emigration centre, and our first official party sailed for Sydney in August. It was a small party of only forty-seven boys, but they were boys of the finest type. They have won golden opinions in the fifth continent, and every province is calling out for more of the same class. It is plain that in Australia the future of guaranteed emigrants such as our boys are assured from a worldly point of view. Further parties will doubtless follow in the wake of the first. From 1886 to the end of 1921, 92,830 boys and girls entered the homes."

IF STOMACH IS TROUBLING YOU

Instantly! End Indigestion or Stomach Misery with "Pape's Diapiesin"

As soon as you eat a tablet or two of "Pape's Diapiesin" your indigestion is gone! Heavy pain, heartburn, flatulence, gases, palpitation, or any misery from a sour, acid stomach ends. Correct your stomach and digestion for a few cents. Each package guaranteed by druggist.

Selling Royal British Yacht

Purchaser Must Not Be of Ex-Enemy Nationality

The royal yacht, *Alexandra*, the favorite boat of King Edward VII, costs the British Government \$125,000 a year to maintain. Hence she is soon to be offered for sale. King George has another yacht, the *Victoria* and *Albert*, which will be retained.

Virtually all the luxurious fittings on board the *Alexandra* will be included in the sale, which is to be without restriction except that the purchaser be not of enemy nationality.

The Oil of Power.—It is not claimed for Dr. Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has been used that it has been used for itself and its excellence is known to all who have tested its virtues and learned by experience.

A dead lion is harmless, a live dog might bite.

Lots of bright hope is exchanged for gloomy experience.

Japs Crowding Out Whites

B.C. Wants to Exclude Asiatics Says Major Crehan

Addressing the Winnipeg branch of the Army and Navy Veterans, Dominion President Maj. M. J. Crehan, of Vancouver, declared the white residents of British Columbia were seeking exclusion of all Asiatics from that province. Referring to what he termed the "peaceful and quiet invasion of British Columbia, Maj. Crehan said they were thrashing white provinces from fishing and lumbering industries and from the market gardening.

Grain From Vancouver to Europe

The first Canadian grain booking made from Vancouver to Europe in 1921 was on October 24th. This year already 56,000 tons have been booked from the Pacific coast port to points in Europe.

Hall's Catarrh Medicine

Those who are in a "run-down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and acts through the blood upon the mucous surfaces of the body, thus reducing the inflammation and assisting Nature in restoring normal conditions.

Dr. J. J. Druggists, Circulars free. F. J. Cheney & Co., Toledo, Ohio.

To Make Stale Bread New

Do not throw away a stale loaf. By the following simple method it can be made quite appetizing.

Take a clean cloth and soak it thoroughly in cold water.

Wipe the loaf with the damp cloth all over until the surface is well moistened.

Make the oven properly hot, and place the wet loaf inside. In about ten minutes the loaf will be quite crisp and, some people consider, better than when it was new.

When the outside of the loaf is crisp to the touch, it is time to take it out of the oven.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

It is easy enough to make a noise in this world; getting an encore is the hard part.

For Fascinating Eyes make the use of MURINE a daily habit. This refreshing eye lotion soon makes eyes clear. Enjoyable. Sold by all druggists.

MURINE FOR YOUR EYES

Are you enjoying a harvest of health?

IN THE plump kernels of wheat and barley Nature plants the seeds of human energy, which man himself must utilize in order to enjoy a harvest of health.

These nutritious grains are carefully selected and scientifically converted into crisp, delicious Grape-Nuts, which provide the nutritive and mineral elements that Nature intended for the use of man.

The 20-hour baking process partially pre-digests the starch and makes Grape-Nuts a rich and delicious food which digests easily and assimilates quickly.

Try a dish of crisp and crunchy Grape-Nuts with good rich milk for breakfast or lunch. Grape-Nuts also makes delicious pudding for November days.

Grape-Nuts FOR HEALTH "There's a Reason"

Made by Canadian Postum Cereal Co., Ltd., 46 Front St., E., Toronto. Factory: Windsor, Ont.

Lloyd George Resigns And Bonar Law Takes Up Reins Of Government

London.—After occupying the office of Prime Minister through seven of the most critical years of British history—three years of war and four years of reconstruction—David Lloyd George went into the wilderness today.

This was the description in his Manchester speech of his position. If the Unionist wing of his followers should desert him, Unionist withdrawal from the Coalition was decided upon by the meeting which Auren Chamberlain had called at the Carlton Club, and which was attended by the leading members of the House of Commons and a handful of lords who were enrolled in the cabinet.

The vote was 186 to 87 against the Chamberlain policy of pledging the party to sustain the Coalition, and in favor of a general election to confirm its course. The meeting was followed by a succession of swift events which carried the Coalition Government into utter darkness.

Andrew Bonar Law will put on the Prime Minister's mantle for a short term of office. The King summoned him to Buckingham Palace and invited him to form a new government, which Mr. Bonar Law will undertake, although the state of his health, which compelled him to withdraw from public life a few months ago, makes it a risky venture. Before Mr. Bonar Law can formally accept the Premiership, however, a meeting of the Unionist party must be held to elect a new leader to carry out the policy to be decided by caucus. This meeting will be held within a few days, when Mr. Bonar Law will be chosen.

Canada Will Enter Empire Exhibition

Premier King Has Asked All Provincials to Co-operate

Ottawa.—Canada will participate in the British Empire Exhibition to be held in London in 1924. An announcement to this effect has been made by Premier King. Mr. King further stated that the extent of Canada's participation depended, to a certain extent, on what the various provincial governments were prepared to do. "He had," he said, addressed a letter to the provincial prime ministers, asking as to the extent which they were prepared to go in taking part in the exhibition, and replies were now being awaited.

Advice For U.S. Navy
Cleveland.—Rear-Admiral Sims, in an address to the City Club members here, declared that the United States must either improve its marine and naval service "or scrap the whole outfit."

Claims Action Of The Government Was Beneficial To Millers

What Men Admire Most In Women Is Perfect Health—The Sign of Strength

Barrie, Ont.—"I was suffering from a rundown system some time ago, was unfit to perform my daily duties, and was advised to try Dr. Pierce's Favorite Prescription. I tried it, took two bottles, and was restored to my natural strength. I cannot praise Dr. Pierce's medicine too highly. It will be willing to write to any one sending a stamped envelope."—Mrs. A. H. Bishop, R. R. No. 1.

Mothers, Advice For You!

London, Ont.—"If I wish I could tell all the women in the world who suffer with woman's trouble, what a wonderful medicine it is. My earliest experience with it was during my first pregnancy. I became nervous and my people were quite alarmed about my condition. The doctor's medicine did not seem to reach my trouble at all so my husband urged me to try Dr. Pierce's Favorite Prescription, and to please him I did. Before I had finished the second bottle the distress and dropsy left me and I felt in absolutely perfect health. I had no further trouble from that time on. I afterwards took Favorite Prescription whenever I was in a nervous rundown condition and it always strengthened and built me up."—Mrs. Lily Stoddard, 448 Ontario St.

At all drug stores, or send the Dr. Pierce's Laboratory, in Bridgeburg, Ont., for trial box, tablets.

M. N. U. 122

CANADA'S FOREIGN TRADE

HAS EXTENSIVE EXCHANGE WITH ASIA AND SOUTH AMERICA.

Ottawa.—Canada has a commercial exchange with Asia, including Japan, but excluding Russia, and Turkish Asia, worth \$42,000,000 a year, according to unverified figures of the Dominion Bureau of Statistics. With Oceania, the Dominion does business to the extent of \$20,000,000 a year, while with Mexico and the countries of South America, bordering on the Pacific, her trade is valued at \$14,000,000 a year. In the aggregate, this trade is about evenly divided between imports and exports.

With Asia, the two accounts almost balance; Oceania sells Canada \$5,000,000 worth of goods and takes \$15,000,000 of ours, but Mexico and the west coast of South America sent Canada \$11,700,000 worth a year and take only \$2,200,000.

The whole subject of trans-Pacific trade will be gone into by the Pan-Pacific Commercial Conference which will open at Honolulu, October 26. F. C. T. O'Hara, Deputy Minister of Trade and Commerce, will represent Canada.

Jail Breakers Captured

House Surrounded and Men Taken Without Trouble

Los Angeles.—Herbert Wilson, former evangelist, mail holder and convicted murderer, and Guido Spignola, convicted robber, who broke jail, were recaptured after 24 hours' liberty.

They were taken without a struggle in a home of a former convict. The men were taken in a house not far from where the automobile which they had stolen was abandoned.

Degree For Admiral Sims

Will Receive Honor From McGill On Anniversary of Armistice

Montreal.—Admiral W. S. Sims and Mrs. Sims will spend the anniversary of Armistice Day in Montreal this year, as the guests of Sir Arthur and Lady Currie. He will have conferred upon him the degree granted by McGill University, "honoris causa," last year.

Honolulu Is Sent to Bottom

San Francisco.—With colds flying, the liner City of Honolulu, gutted by fire, sank in 2,500 fathoms of water after the coastguard cutter Shawnee had poured thirty-one shots into the hull, according to a radiogram received by the coastguard here.

GREEK REFUGEES IN PANIC

FEARFUL LEST TURKS WILL ARRIVE BEFORE THEY CAN LEAVE THRACE

Rodosto, Thrace.—This town has become a jumping-off place in the Greek evacuation of Eastern Thrace. Twenty-eight thousand patriotic Greek refugees are gathered here, all dominated by the same fear of the Turk that swayed the refugee crowds in Smyrna three weeks ago.

Everybody believes the Turks are almost at the door and nothing can reassure them. The general belief is that the Kemalists will arrive simultaneously with the British troops of occupation and every refugee expects to put a long stretch of water between himself and Rodosto before that event. The whole town and all its extra populace have abandoned any means of performing normal duties and have gathered along the beaches awaiting nervously for the ships which do not come.

A body of peasants with about 1,900 farm wagons left recently for a railway station 20 miles to the north on a rumor that the trains would await them there, but the long procession, bedraggled by the rain rendered, having been turned back by the military, who told them they must be evacuated by the sea.

All the shops, even the bakeries, are closed and their owners are with the crowds around the narrow plank quays. The Government has discontinued its bread, ration, Mayor Magaritis and most of the other civil officials left recently.

Preparing For Postal Conference

Canada and United States Will Discuss Many Subjects

Ottawa.—Subjects for the forthcoming postal conference between Canada and the United States will probably include: Limit of weight of merchandise between Canada and the United States; rate on merchandise passing by post between the two countries; insurance of parcels; special delivery service; co-operation between railway post offices in Canada and the United States; money order services; customs declarations; rates on printed matter; and commercial papers; dress of sender on parcel mail between the two countries; exchange of mails between Windsor and Detroit, with perhaps a joint arrangement for conveyance of mails both ways; transit of United States mails through Canada; reciprocal exchange of postal equipment between Canada and the United States; and direct correspondence between postmasters in Canada and the United States.

Should Encourage British Emigrants

Birmingham Members Says Other Countries Are Superceding Canada

Ottawa.—The British Empire is destined to be the dominating influence in the world, Neville Chamberlain, M.P. for Birmingham, said in an address here. He made a vigorous plea for the maintenance of British stock in Canada by the encouragement of emigration from the British Isles to Canada. Of late years, he said, Australia and New Zealand had somewhat superceded Canada in this respect.

Should Encourage British Emigrants

Birmingham Members Says Other Countries Are Superceding Canada

Ottawa.—The British Empire is destined to be the dominating influence in the world, Neville Chamberlain, M.P. for Birmingham, said in an address here. He made a vigorous plea for the maintenance of British stock in Canada by the encouragement of emigration from the British Isles to Canada. Of late years, he said, Australia and New Zealand had somewhat superceded Canada in this respect.

NEW HOG GRADING RULES

ANNOUNCEMENT IS MADE BY HON. W. R. MOTHERWELL

Ottawa.—Hon. W. R. Motherwell, Minister of Agriculture, announced that the hog raising regulations will be made effective on October 30. The regulations under which the official grading of hogs will be undertaken have been approved as submitted, after final agreement by all interests represented by the Joint Swine Committee.

In the interval between now and the date when the new regulations become effective, the new hog grading rules will be in force. The committee of instruction at the Toronto stock yards, so that the official grading regulations as established will be uniform applied at all stockyards and abattoirs in Canada.

Liberal Gift For Charitable Work

Australian Gives Half Yearly Salary To Institutions

London.—R. Reuter dispatch from Melbourne says that Sir John Michael Higgins, chairman Realization Association, has given £5,000, representing half his annual salary, to charitable and other institutions, including £2,500 to the University of Melbourne for the promotion of veteran research.

Sir John made similar gifts in 1921. He holds the honorary position of chairman of the Commonwealth of Australia Central Wool Committee. For some years he practised the profession of metallurgist.

Grain Growers Would Curb Abuses Caused By Mixing Of Wheat

Regina.—Designed to curb abuses arising out of the mixing of grain in private terminal elevators the executive of the Saskatchewan Grain Growers' Association have decided to ask the Board of Grain Commissioners to amend the regulations and provide for strengthening the system of inspection.

The requested amendment provides for a change in the sample market regulation No. 17 "to prohibit private terminal elevators receiving grain owned and ordered 'held' by farmers, except with the consent of the owner in the form of a contract prescribed by the board, a duplicate of which shall be delivered to the owner."

Under present regulations grain received into private elevators must be the property of such elevators with a proviso, however, which in actual practice permits commission houses to enter into a contract for the storage, or handling and mixing of grain consigned to them as "held" grain in a private terminal elevator, with a further proviso that such contract "may, if desired, be in the form of a warehouse receipt, which shall be registered by the board as to quantity only."

It was explained that under this regulation the commission agent is able to dispose of grain consigned to him for holding without the farmer having the slightest knowledge of what has been done with it. Where as the proposed amendment would, through the contract form, give the farmer complete information of the transaction affecting his own "held" grain.

In asking for this amendment and also that the board "employ a sufficient number of competent and adequately paid samplers and inspectors," the resolution further states: "The opinion is widespread that the mixing of grain as heretofore conducted has tended to a lowering of the average of the grades and consequently of the selling value thereof, to the loss of the farmer; that 'see believe' that the interests of the farmers no grain shipped out of terminal elevators should be admitted to any grade if lower than the average of the same grade as at original inspection."

It pays to patronize home industry. Buy from the merchants in your own town.

Canada Has Increased Exports to Germany

Over Million Dollars Advance During Five Months of 1922

Ottawa.—According to official returns, during the five months ending August, 1922, Canada exported to Germany produce to the value of \$3,257,282 compared with \$2,021,544, the value of Canadian produce exported to Germany during the corresponding period of the previous year. Imports from Germany showed a decline. In the five months ending August, 1921, they were \$481,181; in the five months ending August, 1922, \$765,195.

"DON'T YOU THINK YOU SHOULD BE IN HOSPITAL?"

"Don't you think you should be in hospital?" is the remark that greeted us when we offered to shake hands and make the acquaintance of Sergeant Major J. G. Harrison, of the Alberta Provincial Police, yesterday. The sergeant-major has been stationed at the barrier erected west of Coleman against run-running and has taken exception to a report appearing in these columns recently, referring to the barrier as a red light district, inferring, of course, that we meant to say that the police had undertaken to establish what is known as a bawdy house. A red light is suspended there as a warning or danger sign at nighttime, where cars from west are obliged to stop and allow search for booze.

We do not wish to comment any further on the above than to say that from our point of view such a remark is not becoming an officer of the law, and that no police officer has any right to threaten bodily harm to a civilian citizen.

LIQUOR ACT-BULLETIN

Number 1 of Volume 1 of a publication to be issued periodically by the Attorney-General, has reached our desk.

The bulletin briefly outlines the problems confronting the department in the enforcement of the Alberta Liquor Act.

Referring to the recent tragedy enacted at Coleman, the bulletin states: "Every citizen of this province, who stands for law and good order, was shocked by the tragedy that caused the death of Constable S. O. Lawson, of Coleman. Constable Lawson has been recognized ever since joining the A.P.P., as one of its most efficient and conscientious officers. He was stationed in one of the most difficult and dangerous positions in the service, and under very trying conditions he had given ample evidence of his great fidelity to duty in the protection of the public from the outlaw."

"This tragic incident, as well as two previous ones of the same character, only serves to remind a sometimes forgetful public of the dangers to which its official protectors are often exposed in the discharge of their duty. Not only Constable Lawson, but other officers and men in the force whose duties require them to deal with the more desperate type of law-breaker, have daily faced the danger of this same thing and they have never hesitated.

"Complaints sometimes made against the police officers often overlook the fact that a policeman's duty, under any circumstances, is always difficult. It requires him to deal with the most undesirable and sometimes desperate elements in the community, and due allowance will be made by all reasonable citizens for the difficulties, often very great indeed, under which they perform their duties.

"The heartfelt sympathy of the whole population goes out to the widow and fatherless children of the heroic officer."

The famous artist had painted a portrait of himself and his wife. His little son, brought in for a private view said, "I think it's pretty. But who is the strange lady?" "My dear," said the artist reproachfully. "Don't you recognize your own mother?" "Oh, but then why did you paint her with that strange man?"

A favorite song among the Greeks—The Kemals are coming.

FORTUNE-TELLING IN ITALY

The police at Florence have just arrested "Professor" Maetti, a fortune-teller and clairvoyant, who has driven a thriving trade there for some years. He claims to predict the future infallibly and to have control over the laws of time and space. He also—and herein lies the secret of his popularity—undertakes to bring about a happy ending to any love affair.

Women of all classes visited his consulting room and wrote to him for advice. The police have seized over 500 letters, mostly from young girls, enclosing money and begging help in turning the hearts of recalcitrant admirers.

The exact charge on which Maetti has been put in prison this time is not yet known, but it seems that before the war he underwent a term of imprisonment at Brescia for extorting thousands of francs from a very rich girl whose fiancé had left her, and who was willing to pay anything to get him back again.

Fortune-telling looms large in the life of the average Italian woman, and generally comes to the fore in sensational trials and love tragedies. A few months ago a pretty young woman committed suicide because a clairvoyant had told her that her lover would prove faithless. He was being bewitched, she declared, by another girl who had found means to enter his room secretly and sprinkle a love-powder over the furniture. To counteract this spell the widow was supplied by the fortune-teller with a magic ointment which she was to rub on to the hands of the young man next time he came to visit her. This was duly done, but apparently failed of success, for the widow took a dose of poison.

Men and women of every class consult fortune-tellers in Italy, and believe implicitly in their predictions, especially as regards love and marriage. Cards are the favorite means of divination, and many women are adept at turning the cards for themselves and so regularly every Friday—the lucky day—so one must wait until then when the coming week. Love-predictions, magic powders, and amulets are in high request. There is a very useful powder which, if sprinkled in the escape of the letter, you are sending on, is warranted to ensure a speedy and satisfactory answer. A lady, who kept a boarding-house once told the writer that she always used this powder in writing to make arrangements with her clients, and invariably with excellent results.

But it is not enough to secure good influences; you must guard against bad ones. In the country the oxen—the peasant's most precious possession—wear red ribbons in their tails or on their horns to protect them against the evil eye; but in spite of this, an enemy sometimes manages to bewitch them, the symptoms being that the animals moan and refuse to eat in their own stable. The only remedy for this is to get the priest to come and perform an exorcism. Some priests are credited with special powers of driving out evil spirits, and their services are much sought after.

Tragedies and crimes are frequently connected with witchcraft, which causes uncontrollable primitive passions of fear and revenge. Last year, in the district near Pisa, a little peasant boy fell ill. The parents consulted the stregone (witch-doctor), who told them that the child was bewitched. He advised them to boil the boy's clothes in a pot and the first person to come to the house during the process would be the one who had done the harm. The pot with the clothes was set on the fire and after a little while an old beggar-woman knocked at the door. This was proof-positive, and the poor creature was seized by the family and so severely beaten that she died.

Dehorned Cattle

Practice Has Received Endorsement of Prominent Livestock Men

The dehorning of commercial cattle has recently received such striking endorsement by prominent livestock men as should result in the general practice from one end of Canada to the other. It is confidently expected that for strictly economic reasons, growers and feeders of livestock will unite in a nationwide movement to eliminate horns on their commercial cattle, within the next twelve months.

Recently, at one of the most representative livestock conferences ever held in Western Canada, and at which such vital matters as breed improvement, winter feeding, organization for marketing and development of markets, etc., were under the serious consideration of Federal and Provincial Departments of Agriculture, agricultural colleges, representatives of the livestock associations, packers, railway companies and the Canadian Council of Agriculture, the question of dehorning received significant attention, resulting in the following strong resolution of endorsement:

"Experience has proved the great advantage from every standpoint of dehorning commercial cattle, and this conference is of the opinion that a great benefit would accrue to the livestock industry if all commercial cattle were dehorned. Every effort should therefore be made to attain this object and this conference asks for the active support and co-operation of the press, and all institutions and organizations interested in the livestock industry to encourage the practice of dehorning all horned commercial cattle between March 15 and April 15 or during the month of October."

This resolution is an indication of the vital necessity of encouraging maximum gains in feed consumed, obtaining maximum market prices, and eliminating waste. It is a straight dollars and cents proposition and in this age of high production and marketing costs deserves your earnest attention, just as much as any other of the important problems affecting the financial status of the industry which you represent.

Dehorning is no fad. It is a feed lot and market requirement. Horns are a handicap to commercial cattle. They add to the cost of production and discount the selling value of the animal. Your feed supply cannot stand waste. From the calf-pen to the block, horns are a bill of expense to the producer and consumer. They are of no economic value to the farmer, butcher, or exporter, but are often the cause of untidiness, discomfort and injury in feed lot and stable, result in the placing of "second-class goods" on the market, and cause heavy losses in killing. On the small farms and on many large ones, all classes of livestock are pastured in the same field. Scores of cases are known where, as a result of the cattle being horned, valuable young cattle, sheep and lambs have either been killed or disabled through being hooked. Every year, thousands of dollars are lost to the farmer, directly through a lack of that even temperament in the herd so necessary to successful production and an equal chance for every animal in the herd and indirectly through the cut in market price levied on bruised and torn cattle.

In practical experimental work in dehorning carried on in all provinces of Canada by the Dominion Experimental Farms System, the weight of evidence in favor of feeding dehorned stock should give tremendous impetus to the policy. In one typical case a lot of eight dehorned steers made an average gain of 23 pounds over a similar number of horned animals; another lot of twenty-four dehorned steers made average gains of 41 pounds in three weeks; one lot of eight dehorned steers made an average gain of 135 pounds, and another lot a total gain of 910 pounds. In all cases dehorned steers running loose made superior gains to tied steers.

Dehorning permits of loose feeding, a method very conducive to good gains. In a large majority of cases, no reduction in weight occurred and where met with, the loss was overcome by very substantial gains by the end of two to four weeks. It is for these reasons that the dehorning of feeders practice dehorning.

The value of purchasing steers already dehorned is abundantly proved by experiment and experience. Thirty-five steers dehorned after purchasing made an average gain of 31 pounds per head during the first month, whilst seventeen steers bought at time of purchase made average gains of 51.9 pounds. For the entire feeding period the hornless steers made an average gain of 231 pounds, while those dehorned after purchase made an average gain of 186.3 pounds. The steers purchased dehorned had no recovery to make before the commencement of the test. It will pay to dehorn your cattle and, as well, to buy only dehorned cattle.

W. N. L. 1442

The Lily Painted

Marvelous Discoveries Made by Luther Burbank, the Plant Wizard

Luther Burbank, horticulturist and plant originator, nearing his 60th anniversary of a work that has caused a world to marvel, says:

"With patience, you can make a flower of a fruit any size, color, or flavor you want it to be. This knowledge will revolutionize all the history of horticulture. It opens infinite vistas of future development."

So while the giant armistice with its splendid floral fire is included among the most recent of the Burbank marvels, the 3,000 products that will claim his time and attention throughout the coming year, are for man's use rather than his exclusive pleasure.

And of them, the most remarkable is the Burbank walnut tree, whose rapid growth outpaces any in the previous history of trees, the eucalyptus alone excepted.

"The tree that achieves as much growth in ten years as the ordinary walnut can accomplish in 100 years, and that sells at 5 cents a pound, as this wood does at present, will make walnut furniture a different story. I used the Persian and California black walnut 'dog' variety, and the result carries the good quality of both in a major degree."

"An order of 10,000,000 trees from one of the largest furniture manufacturers in America is proof of the hardness and durability of the wood, the beauty of its grain and its adaptability to manufacturing demands. I could not fill all the order. I had to cut it down somewhat. You see, they want 1,000,000 trees for 10 years. I shall provide them with a certain amount—the rest they can grow themselves."

Seeds and plants from all over the world come to Burbank each year, yet he has not a paid collector in his employ at present. The names and fame of the California by adoption is like a huge magnet that all unconsciously draws to it the things of greatest affinity.

"It is like prospecting for pay ore. I am not getting certain from certain indications that I have found, but the extent you cannot determine until you have uncovered the lode. I always know just what I can promise within a certain number of years and much of my work is contracted for that way. I contract a tree-plant to meet certain demands, just as an architect takes a contract to draw plans for a building. If he is a good architect he comes through with plans of the type required within the specified time. I hold the same for me, gratifying that his dreams may have grown like an inspiration beneath his fingers."

"It is the same with me. I can promise, say, a certain type of green tree within six months, and I can in the origination of the Burbank-Empson pea. I told J. H. Empson that I would require six years to produce a pea similar to the petit pois of France, one that would mature all at the same time and that would be in every way suitable for canning purposes. It exceeded my promises in three years time."

A chestnut that will yield a crop of nuts the year the tree is planted has never ending more to the Burbank gardens. An 11-year-old tree of his Sebastopol farm has yielded 12 full crops of chestnuts.

"I have worked on a thing seven or eight years without results, have decided it was a lost cause, and then on the verge of giving it aside when an impulse to give it one more year of trial has come over me. On several occasions that year of grace has provided me with some of my most splendid discoveries. The angle of the work is 'poker,' although I do not play the game, but I have heard such vivid descriptions of the 'yucky' poker sense which is a boon to players."

"For every plant I use 10,000 are thrown on the scrapheap and burned. Some of my seedlings that I have had in the old days I dare say some people do yet. But the things I have done so far are as nothing to the things that may yet be done in this wonderful tomorrow."—Molly Metrick in the San Francisco Examiner.

The "Quest" Has Returned

Sir Ernest Shackleton's Ship Has Reached England

The Quest, Sir Ernest Shackleton's ship, has reached England. Gaius adventures all they have brought the results of an expedition to the continent, but the creator of the enterprise, the spirit that moved them all in their journey lies very far south and can never hear the joyous acclaim of his countrymen. Those who heard his public lectures at Ottawa will recall the earnest and happy bearing of the man, a sense that circumstances could never light all the time against him, and all he asked was a fighting chance to do that which he had planned.—Ottawa Journal.

Sale of Root Vegetables

An Act With Which Every Grower and Shipper Should Be Acquainted

A measure that should attract the special attention of every market gardener and farmer which was passed at the last session of the Dominion Parliament is entitled "The Root Vegetable Act, 1922." Its object is to regulate the sale and inspection of root vegetables. That knowledge of its provisions may be general, the Act itself, and orders and regulations thereunder, have been published in booklet form by the Fruit Branch of the Dominion Department of Agriculture, by which the measure will be administered.

A main provision is that all potatoes, onions, artichokes, beets, carrots, parsnips, and turnips must be sold by weight except when sold with the top leaves attached, or when potatoes are purchased or tendered for sale, by the closed barrel. According to the Act, potatoes are graded into Canadian, Canadian and Canada "A," being absolutely sound potatoes, the round varieties being not less than one and seven-eighths inches in diameter and the long varieties one and three-fourths inches; "B," reasonably sound potatoes, free from dirt, damage or disease and not less than an inch and a half in diameter; and "C," ungraded quality, practically free from damage and not less than one and a half inches in diameter. Onions are graded into Fancy Quality, Choice Quality, Standard Quality and Banners.

Special provisions are made to allow for variations incident to commercial grading and handling. Requirements are also given in the Act for marking and packing the potatoes, and for the definition and the penalties incurred by violations set forth. The provisions of the Act do not apply to new potatoes shipped between June 1 and September 30, to seed potatoes, to green onions, or to potatoes on vines for export when compliance with the provisions would prevent the sale or export thereof to any foreign market. The regulations provide for the strength, dimensions and marking of potato barrels, which, as far as possible must contain seven thousand and fifty-six cubic inches.

A High-Speed Engine

Running by Electricity Can Make Ninety Miles An Hour

Britain's first high-speed electric railway engine, with a safe maximum speed of ninety miles an hour, and capable of maintaining an average of more than a mile a minute on a lone journey, has just been delivered to the North-Eastern Railway.

To new they was made by the Metropolitan-Vickers Electric Company at Trafford Park, Manchester. It will be used on the forty-four miles run between York and Darlington, and for hauling the famous "Flying Scotsman" between York and Newcastle.

The new engine, which has been designed to secure absolute safety when travelling at top speed, is in the nature of an experiment. If it proves a success the whole North-Eastern system may, in the course of time, be equipped with electrically driven engines.

The new engine, which develops 1,500 horsepower, can make a run of high speeds with a heavy load of 490 tons. It is furnished with an engine for producing the steam for heating the passenger coaches. Steam is produced electrically.

Radio and Farm Life

Radio-Telephone of Supreme Importance to the Farmer

A writer in Farm Mechanics gives expression, as so many others have done, to the thought that radio will be of supreme importance to the farmer. "With the advent of radio-telephone," he says, "there has been placed in the hands of the rural population a utility which is fast revolutionizing social life on the farms. The high-class entertainments and educational lectures which were previously available chiefly to city dwellers are now within the reach of every farmer. He need no longer make a special trip to the city to hear an opera or lecture by some noted explorer. The radio-telephone has bridged this gap and now makes it possible for the people of the country districts to enjoy the best of the modern entertainments right in their own homes."

Family life. "Did you know whether you intend to marry me?" asked the girl. "Duffy hair," "Yes," answered the young man with large eyes. "All he said was that he wasn't very well acquainted with me and he didn't see why I should tell him my troubles,"—Washington Star.

Princess Yolanda, the eldest daughter of the King of Italy, is thought to be the most accomplished horsewoman among all the women of European royalty.

Inspect Smoke And Furnace Pipes

Eternal Vigilance Is Needed to Safeguard These Important Danger Points

In the fall and early winter, special attention should be paid to stove pipes, furnace pipes, smoke vents and flues. Where these are of metal they frequently rust, come apart or deteriorate during the summer, and when fires are started up in the fall, or they are put to a severe test during the first very cold weather, a blaze is likely to result. Now that the prevention and safety first have become national slogans, the importance of careful supervision of heating apparatus and flues should be recognized by every citizen, and a thorough inspection should always precede the first use of heating apparatus.

There is special need of unusually careful attention to flues, smokepipes and heating apparatus generally this season, because of the abnormal fuel shortage. If the flues or smokepipes will be compelled to use poor grades of coal and this will necessarily introduce many serious fire hazards, unless great care is taken to see that flues and smokepipes are kept clear and that proper safeguards are provided for other dangers that may develop.

Fires due to faulty furnace pipes and smoke pipes have been unusually numerous this season, especially where there was dampness. Where the surface was already corroded by the heat and fumes, the dampness soon rusted the metal so that a pipe which looked all right on the outside collapsed with the slightest strain. The danger of such pipes in basements, often near wooden partitions and ceilings, is evident, but only an inspection would reveal the interior weakness.

These warnings should be especially emphatic as to dwellings, for basement fires are apt to get under dangerous heading before they are discovered, and when they occur at night, life as well as property is endangered. Special attention should also be paid to furnace pipes and smoke vents in churches and schools, because of the large number of people whose lives are at risk. School boards and church trustees, working on the theory of personal responsibility for preventable fires, should give special attention to these danger points, and see that the flues and smoke pipes leading from the furnace to the chimneys should be replaced each year to ensure safety. An ounce of fire prevention is worth a pound of fire extinguishment.

Converting Wet Grasses Into Hay

Drying Hay by Artificial Means Meets With Success

From time to time experiments have been made in artificial means of drying hay, but until lately these have been of a very primitive nature, and highly interesting method was, however, recently tested with excellent results on a British farm. This method takes advantage of the fact that wet grass, when piled in a risk, begins to ferment. The heat thus generated causes the conversion of grass into hay is not simply a process of drying; it is a chemical process assisted by certain bacteria, and it must be carried out at a certain temperature in order to give the hay its fragrant hay quality which is attractive and nourishing to cattle. The inventor piles the newly mown wet grass over a frame fitted with an electrically-driven fan. When the heat is generated, he starts up the fan and carries the hot air through the mass of wet grass. By a careful regulation of the air current he maintains the temperature of the grass at the correct level until the whole of it is converted into hay. The process is much cheaper than the ordinary method of hay-making, and it has the supreme advantage of being independent of the weather. It can be carried out on the field where the grass is mown, so that no expense is incurred in carting the hay to a barn. Experiments have shown that this produced state that it is of very good quality.

Religious Revival in Wales. Pervid religious revival scenes in Swansea, Aberystwyth, and other parts of Wales are taking place, and as a result of the revival, thousands of converts are being baptized. The people are said to be praying and singing with almost unceasing fervor. The Daily News correspondent comments the revival with the statement that this is the most important cause leading to unemployment thus causing the people to think more deeply than ordinarily.

Q. G. of Buffalo Bids. Governor-General Lord Blyth can lay claim to being the owner of the only buffalo hide going in existence. He was in the city with the hide after the Cree Indian chiefs had been presented to him during the vice-regal tour. In Arrango, the third estate was developed as early as the third century.

Dredger Unearths Prehistoric Bones

May Be Those of Woman Told by Experts

Bones of a prehistoric woman, believed to have been a free climber, have been found in the bed of the River Cam, and are being submitted to expert opinion in London, according to the Daily Express.

The bones were brought to the surface by a dredger within a quarter of a mile of the famous Fenland Inn. "The Five Miles From Anywhere; No Hurry!"

The whole district is one vast forest of buried hills, which were in existence many thousands of years ago before the Fens were formed, and it is hoped to recover the complete skeleton.

"The find is a most interesting one," said a Fellow of the Royal Society.

"The leg bones are undoubtedly those of a woman, but they are of extraordinary configuration."

"Whether she was, she had a pretty face," said another expert.

"If alive today, she would be a short, deep-chested creature, covered with hair, and with long, ape-like arms and prehensile toes."

"Her home would be a rudely built platform of sticks, with a family likeness to a glorified cornucopia. From these excursions would be made among the tree tops, and her mate swinging himself among the branches from branch to branch."

"When on the ground her gait would be that of a monkey, with the arms swinging to the knees."

The bones of a pelican have also been found. This points to the existence of a lake watering, as tame pelicans were kept by the inhabitants of these curious huts, and eaten when required.

Continental Air Line Growing

Over Eighty Per Cent of Passengers Carried by British Companies

The record of traffic on the continental airways for August shows 2,882 passengers carried across the channel, compared with 1,091 in July, and 1,021 in August, 1921.

Of the British companies carried 82 per cent of passengers and the remainder was shared between French and Dutch companies.

The British proportion in 1921 was 45 per cent of the total business.

Over 37 tons of goods were carried last month, including a daily average of a ton of newspapers from London to the continent. Altogether over 37 tons of newspapers were carried.

The number of machines engaged in the London to Paris, Brussels and Rotterdam services was 312, compared with 111 in July. Of the total 598 were operated by British companies.

There were no casualties, nor injuries sustained during the month. Over 95 per cent of the flights by British machines were completed within the scheduled period of four hours.

Plans Non-Stop Flight Over North Pole

Amundsen Will Make Attempt Next May or June

Word direct from Captain Roald Amundsen that he and his pilot, Lieutenant Omdahl, will hop off from Wainwright, Alaska, in the latter part of May or the first of June to fly across the North Pole to Spitzbergen, was brought to Seattle by J. J. Ward, Government school teacher at Wainwright.

Amundsen plans, Ward said, to make the flight of approximately 1,700 miles across the Polar regions in one jump, carrying for subsistence only a bottle of hot tea and a sandwich.

The schooner Maud, Amundsen's exploration ship, according to Ward, is drifting northward in the ice floes at such speed that the explorer was of the opinion that it might cross the Pole, and reach Spitzbergen in a year, though it may take longer. The Maud is provisioned for seven years.

New Discoveries of Gas

A three-million-foot flow of natural gas has been struck at Barrow, near Taber, by the Calgary Gas Company. A flow of gas was also struck at Taber, which is near Medicine Hat, Alberta. Natural gas is found in great quantities in parts of Alberta, in Calgary and a number of other places it forms the principal means for cooking and heating in the homes of the residents. It is also largely used in manufacturing establishments.

A Bad Combination

Mark Twain was once asked what he considered to be the worst combination of things. He replied: "Disrespect and a bad wife."

Disrespect and a bad wife were the two things which Mark Twain considered to be the worst combination of things.

Directly and indirectly, about 130,000 people are employed in Great Britain in growing, manufacturing and selling mustard.

Livestock Trade

Markets Generally Well Sustained and the Outlook Promising

The markets for the Dominion livestock branch on the whole of the livestock market and the operations carried on during the month of August clearly indicate that at the end of the month the outlook was promising, prices generally being rather better than in August last year. The excellent feed situation in Ontario is reported as creating a strong demand for store cattle and that outlet as sustaining prices of unfinished stock. Movements of store cattle from the Toronto market to the country west of the lake for the year to date, being 7,567 compared with 2,900 in the same month last year. Six carloads of ewes were shipped from the same market under the Free Freight Policy of the Dominion Livestock Branch, and many orders remained unfilled.

A special note in the Montreal report is that the advantage of castrating and docking lambs was forcibly illustrated by a loss of lambs on a farm in Quebec. The loss was a premium of fifty cents per hundred over other lambs that were sold the same day.

The Winnipeg report states that among cattle received from Northern Saskatchewan and Alberta, very few number of four and five-year-old steers lacking finish, which were not only a drag on the market but were practically unsaleable. At the same time, the market for short and prime steers showed upward, being two dollars at the close, about a dollar per head reached during the month. Lambs and sheep also showed an upward tendency in Winnipeg at the month's close. Edmonton reports farmers running over, cattle to market in feet. By a shortage of feed, heavy rains had so improved the pasture that cattle from the Peace River district that arrived towards the end of August showed good quality and good finish. Some buyers from the United States were in the Edmonton market. One buyer took 5,500 head of cattle, principally steers and feeders, and a load of "bitchers" was shipped to Chicago. At Calgary the market was generally active, many cattle being purchased for transport to the United States, one firm alone taking 2,043 head of stock.

Will Issue Seed Catalogue. Booklet Will Be Published Before End of Year.

A catalogue of pure seed for sale by Saskatchewan farmers will again be published this year, according to M. P. Tullis, field crop commissioner of the Saskatchewan Department of Agriculture. The catalogue will contain a list and distribution of a similar catalogue last year a substantial amount of registered and other high grade seeds were sold. The catalogue included wheat, oats, barley and flax as well as a few miscellaneous kinds such as corn peas and millet.

The catalogue now in course of preparation will be published before the end of the year and will list a wide range of seeds, adding such crops as alfalfa, timothy, and clover. The catalogue will also contain a list of the seeds of the Arctic variety. Growers wishing to take advantage of this catalogue are requested to submit to the provincial field crop branch pure samples of their product for purity and quality tests.

The information published will state "quantity for sale," "prices," "percentage germination," and remarks regarding seed weeds or other undesirable features, as well as special points of merit.

Farmers and others in the market to buy high quality seed should apply for a catalogue showing what other Saskatchewan growers have on hand to supply their needs, stated Mr. Tullis.

"An effort will be made to get the list into the hands of as many prospective buyers as possible in Saskatchewan and neighboring provinces and states."

Elementary School Attendance. A total of 1,000,000 attended elementary and secondary schools exclusive of Indian schools, were not under the control of the Department of Education in the different provinces of the Dominion in 1921, according to a report of the Bureau of Statistics for this number. The figures were in Prince Edward Island, 1,435 in Nova Scotia, 1,435 in New Brunswick, 7,530 in Ontario, 1,148 in Manitoba, 3,356 in Saskatchewan, 2,374 in Alberta, and 1,591 in British Columbia.

Four Shipments. Four shipments from the port of Montreal to Europe are considerably heavier than last season and give indications at present of keeping up to the new level. Up to the end of August, shipments to Europe, in total, amounted to 1,000,000 tons, which is 1,000,000 tons less than the same period last year. A ship has left this port without carrying a cargo of coal.

Items of Local Interest

A dance will be given in Tuxton's hall, Oswestry, on tomorrow (Friday) night.

The Consolidated Smelting Company are erecting a large laundry at Trail, B. C.

Some girls are built for short dresses, while others use very poor judgment.

A convention of teachers of The Pass was held at Blairmore on Saturday afternoon last.

The boys of the Tuxton Trail Rangers and C.S.R.T. will hold their annual convalescence at the opera house on the evening of Wednesday, November the 1st.

A Shandro postmaster stole three dollars and was given three years imprisonment. That worked out in German marks would be pretty good remuneration at that.

Since the police became established at the gate west of Coleman, there evidently has been no rum running about that particular part of the road. The road is perfectly dry.

Action was taken last week by the proprietors of the Palm Cafe, Limited, against K. M. Bowen for the recovery of a board bill. He was allowed thirty days suspended sentence and ordered to make good within the time.

Describing first aid and its purpose, a little girl at the local school said that the first aid team might be called out at any time the police should enter into a fatal encounter among themselves.

A man at Crow's Nest was rolled on Sunday evening last and relieved of one hundred dollars cash. The culprit is believed to have moved east on a freight train, but despite the vigilance of Sergt. Scott and his men, no trace of the man could be found.

A paper states that Chief Bowker, of the Lethbridge city police force, entertained a dose of pneumonia. Well, what about that? Lots of folks here feel that if they were half the size of Bowker they could entertain a dozen pneumonia doses at one time.

A benefit game of football was played at Fernie on Sunday for the benefit of the C.N.F. League. A picked team played the winning Michel team. That team was composed of—Poth, Wilson and Thornton, of Fernie; Corlett, Fyles and Robertson, of Coal Creek; Jackson, Wilson and McAndrews, of Blairmore; Jepson, of Bellevue, Reserves—Whelan, Simms and Sweeney. The game resulted in a draw.

Last Sunday evening we enjoyed a rabbit supper, after which we went to church. Our hopping around very much annoyed the congregation, but more so when we sat upon our bunsches to nibble the buds off the beautiful bouquet adorning the pulpit. That night we awoke several times and could see twenty-two and shot guns pointing at us from all directions. There and then we decided we'd rather be a human being.

WORK OF ALBERTA PROVINCIAL POLICE

The annual report of the Alberta Provincial Police for the year 1922, recently published, contains much valuable information relative to the activities of the body.

The strength of the force, as at the end of December, was 7 officers, 173 non-commissioned officers and men, 65 horses, 16 automobiles, 2 power boats, 7 bloodhounds.

In criminal offenses there were 6,851 cases entered, 128 awaiting trial with 5,719 convictions obtained, giving a percentage of 85 in convictions. The total number of prisoners handled by the force during the year was 3,491.

The number of cases against women was 81, an increase on the previous year. Thirty-four convictions were obtained. Forty were either withdrawn or dismissed and there were seven awaiting trial.

Offenses against property, ordinary thefts, accounts for 600 cases entered, against 624 in 1922, a decrease of 24 cases. Four hundred and forty-four convictions were obtained, 130 cases were withdrawn or dismissed, and there were 26 awaiting trial.

There were 83 cases of horse and cattle stealing entered this year, 46 convictions obtained, eight cases dismissed, and six important cases awaiting trial, an increase of four cases on 1922.

During the year the force handled 281 insane persons—91 women and 190 men.

There were 1362 cases entered under the Liquor Act and 1,260 convictions obtained, 95 dismissals and withdrawals, and one case awaiting trial. The special liquor squad accounted for 291 cases, obtaining 284 convictions; 1071 cases were handled by the uniformed members of the force, and 1002 convictions obtained. This shows a decrease of 177 cases handled by the force as compared with 1922.

The decrease is due to the fact that after February 1921 the different city police bodies handled the Liquor Act cases in the cities.

Father Cosman escorted his junior Alpine Club, (twelve boys), to the top of Turtle Mountain on Saturday last. Return was made to the water belt near Beard's Camp, where luncheon was partaken of.

Mark A. Shields, of Spokane, a member of the editorial staff of the Spokane Chronicle, has been in The Pass lately. He is writing a series of articles for his paper, telling how the rum runner works along the Canadian border and how the source of supply on the Canadian side is made available for U.S. consumption.

Angelo Altamora is again in difficulties. Angelo was for a time official representative of a local hotel owner. Of late he has been operating a bar in Natal, B.C. and his arrest was made for a breach of the B.C. liquor law.

William O. Patterson, formerly a logging contractor, and lately proprietor of the Bridesville Hotel, was shot and killed in his hotel on Thursday night last. Bridesville is sixty miles west of Grand Forks on the highway leading to the international boundary.

TO ERECT MEMORIAL TO EARLY MISSIONARIES

Ottawa, Ont.—The most probable site of the martyrdom of the Jesuit missionaries, Fathers Brebeuf and Lalumière, by the Iroquois in 1649 at the mission of St. Ignace situated near the present town of Midland, Simcoe County, Ontario, has been donated by Mr. Charles E. Newton, for the erection of a permanent national memorial to commemorate one of the most heroic episodes in early Canadian history. At this time the hereditary feud between the Iroquois and Huron Indians reached its climax and a terrible visitation of the Iroquois resulted in the practical annihilation of the Huron tribe. Urged to flee, the heroic missionaries declared that he priest must stay with his people and amid the whoops and yells of the Iroquois they were dragged through the forest and subjected to the most frightful tortures until death released them from their sufferings. Mr. Newton, at one time reeve of the township of Tay and for many years in the service of the provincial government, has shown much public spirit and historic interest in preserving the site and at the request of the Canadian National Parks Branch has decided over an acre and a quarter of his farm for the erection of a suitable memorial and tablet in memory of the heroic priests. The work will shortly be taken in hand and the memorial will add one more to the notable historic shrines of Canada.

FREM ON UTILITIES BOARD

Since the death of John Stocks, in 1917, there has been no appointment made to fill his place on the Public Utilities Board until the week, when J. J. Freman, drought relief commissioner, received the appointment, and will assume his duties on December 1st.

Mr. Freman came to Alberta from Gloucester City, England, thirty years ago, and located in Lacombe. He has been associated with the United Grain Growers as secretary since it was organized and was also first secretary of the U.F.A., a position he resigned several years ago, when the work became too great for one man to handle both positions. He was also secretary of the association of municipalities.

SCHOOLS OF AGRICULTURE OPEN OCTOBER 31st

The agricultural schools of this province will be opened for the winter courses on October 31st. The enrollment of pupils is progressing and it is expected that there will be an increase in attendance over 1921. On the 17th and 18th the principals of the different schools, Mr. S. H. Gaudet, Vermilion, Mr. F. S. Grisdale, Oils, Mr. J. C. Cooper, Claresholm, and Mr. O. S. Langman, Raymond, were in Edmonton and attended a conference, at which the work of the schools and the plans for the winter session were discussed with department officials. Mr. H. A. Craig, deputy minister of agriculture, and Mr. A. Ross, deputy minister of education, attended the meeting.

New York landlords have a new grievance. They complain that the steam from the house-rew stoves of their tenants is melting the wall paper off the walls.

The Thrift Way

Savings Certificates

- 1 Purchase Province of Alberta "Demand Savings Certificates."
- 1 They bear interest at the rate of 4 1/2 per cent. per annum.
- 1 They are issued at par in denominations of \$5, \$10, \$25, \$50, \$75, \$100, \$1,000 and \$10,000.
- 1 They are redeemable at par on demand at the office of the Deputy Provincial Treasurer.
- 1 They are backed by all the Resources of the Province of Alberta.

Remittances should be made by marked cheque, money order or postal note.

All cheques payable at par.

For further particulars, write or apply to

HON. H. GREENFIELD,
Provincial Treasurer.

W. V. NEWSON,
Deputy Provincial Treasurer.

An elephant's trunk has about 40,000 muscles and is the whole skeleton of a firm of the only trunk a baggage man Clark Bros. & Co., Calgary, was can't smash. It has been suggested that citizens, run after, should be appointed to the position of police officers.

"Built in Canada"

Studebaker

ROADSTER LIGHT-SIX COUPE-ROADSTER

\$1375 \$1775

The Studebaker Light-Six Roadster and Coupe-Roadster were primarily built for business use. In meeting the urgent demands of business, they naturally have fulfilled the needs of the small family.

Each is built for hard usage, day in and day out. And as they are completely Studebaker built—you know they will stand up under hard going.

The bodies are attractive, roomy and thoroughly comfortable for all-day travel. Ample luggage space is provided under the rear deck.

There's an internal hot-spot to reduce gasoline consumption to a minimum. Valves are inclined at a 20 degree angle to give a new measure of power, greater flexibility and better acceleration. Crank shaft and connecting rods are machined on all surfaces, thus eliminating vibration and insuring longer life to the motor.

Studebaker low prices are made possible by great volume and complete manufacture. Studebaker quality is traditional.

Both models are upholstered in genuine leather; have ample space under the rear deck for luggage, gasoline and other good transportation facts, and cow ventilation.

WANTED—To hear from the owner of good Ranch for sale. State cash price, full particulars. D. F. Bush, Minneapolis, Minn.

— Mainman Lodge, No. 66, meets every Tuesday night at 8 p.m., in the Golden Gate hall. Officers for the ensuing term: W. T. Patterson, N. G.; Wm. Oliver, V. G.; D. A. Howe, R. S.; J. R. Harmer, P. S.; J. Montalbetti, Treas.

— Crow's Nest Entertainment No. 3, meets on the second and fourth Wednesday of the month. Officers for ensuing term: J. Patterson, C.P.; W. T. Patterson, R.N.; A. McPhail, J.W.; Wm. Patterson, Sec'y; J. Montalbetti, Treas.

— Crow's Nest Entertainment No. 66, meets the first and third Thursday of the month at 8 p.m. Officers: Sister Fraser, M.G.; Sister Archer, V.G.; Sister McPhail, R.S.; Sister Walker, P.S.; Sister Fidler, Treas.

— Blairmore Lodge No. 118, meets every Monday night at 8 p.m. Officers: H. Brown, N.G.; E. Harrison, V.G.; J. Montalbetti, R.S.; J. Wynd, Treas.

— Amateurs Entertainment No. 17, meets the first and third Wednesday of the month. Officers: A. R. Carr, C.P.; Stephen Barry, R. S.; Harry Johnson, V.G.; Fred Patterson, J.W.; J. Montalbetti, Treas.

— Bay of Hope Entertainment No. 66, meets the first and third Wednesday of the month. Officers: M. Barker, M.G.; Sister M. R. Dyer, V.G.; Sister M. H. Walker, R.S.; Sister M. A. Gaudin, Treas.

Visitors of the Order are cordially invited to attend the above lodges.

MAGGIE AND JIGGS AT THE GOLDEN GATE

St. Peter stood guard at the Golden Gate. With a solemn mien and an air of sedate, When up to the top of the golden stairs.

Maggie and Jiggs ascended there. Applied for admission; they came and stood.

Before St. Peter so great and good; In hope the city of peace to win.

And asked St. Peter to let them in, Maggie was tall and dark and thin,

With a scraggly beard on her chin, His face was pleasant and all the while.

He wore a kind and gentle smile. The choir in the distance the echoes woke.

And Jiggs stood still while Maggie spoke: "O thou who guardest the gate," said she.

"We two come hither beseeching thee To let us enter the heavenly land,

And play our harps with the angel band. If me, St. Peter, there is no doubt,

There's nothing from heaven to bar me out; I've been to meeting three times a week,

And almost always I'd rise and speak. I've told the sinners about the day

When they'll repent of their evil way. I've told the neighbors—I've told 'em all—

"Bout Adam and Eve and the primal fall. I've shown them what they'd have to do

If they passed in with the chosen few. I've marked the path of duty clear—

Said out the plan of their whole career. I've talked and talked to 'em loud and long,

For my lungs are good and my voice is strong. So good St. Peter you'll clearly see

The gate of heaven is open for me. But Jiggs here, I regret to say,

Hasn't walked in exactly the narrow way. He smokes and swears, grave faults he's got,

So I don't know whether he'll pass or not. He never would pray with an earnest vim

Or go to revival or join in a hymn. While I the sins of neighbors bore

He guided about with Dinny Moore. He made a practice of staying out late

Which is a sin all women hate. But at last when he did come home

The rolling pin went straight for his nose. I know him, St. Peter, know him well;

To escape from me he'd go down to hell. But dear St. Peter, I need him here,

And hope you can see your pathway clear. On earth I bore a heavy cross;

Give me in heaven still Jiggs to boss. I've brought my rolling pin, plate, and jar,

To keep him dodging among the stars. "But say, St. Peter, it seems to me

This gate isn't kept as it ought to be. I ought not to stand by the opening there,

And never sit down in that easy chair. And say, St. Peter, my sight is dimmed,

But I don't like the way your whiskers are trimmed. They're cut too wide with an outward sweep;

They'd look better narrow and straight across. St. Peter sat quiet and stroked his staff,

But in spite of his office he had to laugh; Then said with a fiery gleam in his eye,

Who's doing this, Maggie, you or I? Then he rose in his stature tall

And pressed a button on the wall. And said to the imp who answered the bell,

"Escort this lady around to hell." Slowly Jiggs turned by habit bent

To follow Maggie wherever she went. St. Peter, standing on duty there,

LOBBERS DIFFICULT TO KILL

Boiling over a slow fire is the happy death a lobster can meet, so it has been determined at the Jersey Marine Biological Station. The experiments were carried out by Joseph Sini, a well known biologist for the Jersey Society for the Prevention of Cruelty to Animals, whose members associated the prevalent method of killing lobsters with medieval torture.

Lobsters, says Mr. Sini, are extremely difficult to kill. Piercing the brain does not seem to cause the lobster more than temporary annoyance, since the brain is a mere ganglion the size of a hemp seed. He has to be killed all over. To throw him into boiling water fails to do the work either mercifully or quickly, since he struggles violently to escape for about two minutes.

The pleasantest way to end a lobster's troubles, Mr. Sini finds, is the old-fashioned way of placing him in cold water and bringing him to a boil. As the water warms, he becomes merely lazy and rolls over as for sleep. By the time the water reaches the comparatively mild temperature of 70 degrees, Fahrenheit, he becomes comatose. At 80 degrees, he is dead.

To use a human illustration, the biologist says, it is like a person succumbing to a heat wave, with loss of consciousness and a painless end.

We have kidded the women About their hobbled trousers. We have joshed them a lot About their short dresses. We have looked, then joked About their bare knees, But women goes on Doing just as she pleases.

SCHOOL FAIRS FOR 1923

An important conference of officials of the department of agriculture and the department of education, interested in the work of the Alberta School Fairs, was held in the government buildings on Tuesday of last week. The school fair movement has become very popular, and very substantial success attended this year's fairs. The conference discussed ways and means for improvement. There is complete co-operation between the two departments in encouraging expansion along the lines of education which is brought into prominence through the activities of the school fairs. The prize lists and circulars regarding the 1923 fairs will be issued and put in circulation before the end of the year.

Observed that his head was bare, "Jiggs, how long has that been we?" And then he thoughtfully added "Why?" St. Peter was silent with head bowed down.

He raised his head and scratched his crown; Then seeming a different thought to take,

Slowly half to himself he spoke: "Thirty years with that woman there,

No wonder the man hasn't any hair. Swearing is wicked, smokes not good

He smoked and swore—I should think he would! "Thirty years with that tongue so sharp—

Hot Angel Gabriel! Give him a harp! A jeweled harp with a golden string,

Good Sir, pass in where the angels sing. And Gabriel, give him a seat alone,

One with a cushion, up near the throne; Call up some angels to play their best;

For Jiggs has surely earned a rest. "See that on fine ambrosia he feeds—

He's had about all the hell he needs. It isn't hardly the thing to do—

To roast him on earth and the future too." They gave him a harp with golden strings,

A glittering robe and a pair of wings. And Jiggs, looking down from his high level

Thought of Maggie and felt sorry for the devil. —George Bradshaw, in Marquette Magazine.

QUEBEC PREMIER TAKES EXCEPTION TO LIQUOR TALK

In a statement handed to the Quebec press, Premier Taschereau takes exception to statements made in the course of a temperance rally, addressed by Dr. C. W. Calley, of London, England, who is touring Canada, lecturing on the effects of alcoholic liquors, and Rev. Ben Spence, of Toronto, of the Dominion Alliance.

"I have no objection," said the premier, "to English physicians preaching the great benefits derived from temperance and showing the evils of alcoholism. But if alcoholism is making in England and Scotland such ravages as described by Dr. Salley, and if the Canadian race is as good and sound as he described it, I do not see why he does not use his energy in trying to remedy the conditions existing in his own country, instead of coming here to decry England."

The fact that Dr. Salley, from London, is accompanied by Rev. Mr. Spence, of Toronto, renders rather mysterious the real goal he is aiming at by his visit to Quebec. It is evidently an attempt to impose prohibition on the province of Quebec, instead of promoting real temperance. To convince Quebec that prohibition is an effective remedy to alcoholism, it could take something different from the results produced in the United States and in the prohibition provinces of Canada. It is futile to hide the truth and play with figures. It is claimed that criminality is increasing in Quebec and British Columbia, where liquor is sold, while it is decreasing in the provinces where prohibition is in force. The official statistics in Ottawa prove the contrary. These gentlemen from Toronto can do better than come and preach here. They seem to have forgotten the old saying, "Doctor, cure yourself first."

MONSIEUR DE MOSCOW

(Dr. Frank Crane)

The public executioner in Paris used to be called Monsieur de Paris.

Under the old regime the job of headman was hereditary, like all privileges and descended from father to son. The family which had this right was entitled to the blazon of Monsieur de Paris.

The bolshevik paradise will stand for none of this hereditary nonsense. It will not admit the shameful survival of privilege.

According to a dispatch from Heligoland, the bolshevik government in Russia has taken measures to create at Moscow a school of executioners.

So doing, it has made another of those gestures so striking to the imagination which illustrates with what solicitude and intelligence the paternal power of the proletariat is busy with the welfare of the people.

The announcement also states that a laboratory is placed at the disposal of the pupils.

The full benefit of science is to be placed at the disposal of the gentlemen whose business is it to chop off the heads of criminals.

Thus we have another step toward the coming democracy; another indication that the gentleman in charge of things in Russia are going to fashion a new world.

One can but wonder what sort of instruction the pupils in execution are going to receive.

Will there be practical exercises in decapitation? Will there be autopsies and dissections in connection with the course of cephalotomy?

Will there be experiments in poison and the culture of the disease germ? In fine, shall we at least realize the dream of making murder a fine art?

Under the grateful influence of competition, the young laborers in the garden of capital punishment will doubtless discover a thousand and one new and ingenious ways to shorten the lives of those undisciplined citizens who refuse to believe in the autocracy of the proletariat.

Still, if we are to have capital punishment, it might be as well to have the matter attended to by ex-

Canada's Potential Wealth And What It Means To The United States

Paul R. Russell, Vice-President of the National Bank of Commerce of New York, writes:

"Clearly, trade between Canada and the United States is vital to their material prosperity, yet to realize the vital general interest in foreign trade in this country during recent years, Canada is practically ignored in current discussions of trade relations."

In the past, few Canadians bought of the United States three times as much as did all South America, and as much as France and Germany together. The Dominion, as a customer, is second only to the United Kingdom. Yet our second best customer is virtually ignored at Washington.

To quote Mr. Russell further: "Never before have there been two countries practically identical in speech, customs, government, standards of life and conditions of production, with 2,000 miles of boundary line, and most of the natural lines of trade crossing this boundary."

Consider the condition. In all history it is unique. Our publicists lament the cross-current lines of custom duties that defy common sense. Yet our Washington tariff-makers are heightening the indefensible wall against trade with our friendly, productive and potentially rich neighbor to the north. Let us cast the beam out of our eyes. Before we rail at the mole in Europe's eye.

Canada today faces a future comparable with the present of the United States. Capitalists consider it as one of the most favorable lands for investment on earth. The Government functions well, the people have character, the physical endowments are superlative. The Dominion has unmatched coast and inland fisheries, lumber that will be made a permanent asset by sensible conservation. It possesses one-sixth of the world's known supply of nickel, and still has two hundred and fifty million acres of available soil waiting the plow. Economically, Canada can become to us, what our own Great West was to our grandfathers—that and more. As for waterpower, Canada has so much that certain regions are bound some day to become great manufacturing areas.

As for agricultural competition, it is no more exists than between Minnesota and Wisconsin. The experience with our Emergency Tariff of 1931 shows that agricultural prices in Minneapolis are not affected by those in Winnipeg. Between the province of Manitoba and Minnesota, there is as good reason for free trade as between Minnesota and the Dakotas.

Mr. Russell, with good reason, says that "a widespread understanding by the people of both countries should lead to trade policies as far removed from medieval concepts as are the three thousand miles of imaginary boundary from the exaggerated nationalism which finds expression in the unbearable burden of modern armaments."—Minneapolis Journal.

Small-Town Fire Engine

Tandem Bicycle With Pump Attachment Proves Very Efficient

What might be described as a "double tandem bicycle with four wheels arranged like those of a wagon, and four seats for riders, two in front and two behind, and carrying a hose reel, rotary pump, etc., was exhibited recently in Paris. The machine is intended as a fire engine in small towns. When the scene of the fire is reached the pedals are thrown into gear with the pump, the hose is unrolled, and the riders, resuming their seats, work the pump by means of the pedals. It is claimed that this machine can outstrip any fire engine drawn by horses on the way to a conflagration, and that the pump is at least as effective as those of the hand engine used in many towns.

Where Women Live Long

Take a map and draw a ring round the villages between Chichester, Midhurst, Petworth and Arundel in West Sussex. Within that area which contains the quietest and most peaceful tract of country in England, women are reputed to live longer than anywhere else in the world. The longevity of the women of West Sussex is being quoted extensively in America. London Sunday Pictorial.

Counsel—What is your age, madam?

Witness (hesitatingly)—I have just twenty-three summers.

Counsel—How many years were you blind?

The Psalm of Canada

Story of the Christening of a United Canada

The following story of the Dominion's christening is said to be authentic:

When it was decided to unite all the interests of Canada under one government in 1867, there was much discussion as to the name under which the united government should be known. Those who met in the cabinet made different suggestions, but none was big enough. One of the members (Sir Samuel L. Tilley) read that night the 72nd Psalm, and when he came to the eighth verse he said to himself: "There is a name for Canada! The next day he read this verse to his fellow-members: 'He shall have dominion also from sea to sea, and from the river to the ends of the earth.' Pointing to a map, he called attention to the geographical position of Canada. Literally, from sea to sea, and from the river (St. Lawrence) to the end of the earth, as far as the earth extends. The suggestion was agreed to with one accord, and the new country has been called the Dominion of Canada ever since. No wonder Canadians call the 72nd Psalm the Psalm of Canada.

Gypsy Band In Every Village

Depth of Expression Is Found in the Gypsy Note

Nowhere but in Hungary are found so many musicians who play without being able to read music. It is to the gypsies that the world owes its appreciation of the true Magyar music. Leland, the historian, says: "The Hungarian gypsy has a deeper, wider and original feeling in his music than any of his European brothers."

In every village there is a gypsy band. "The violin and the cimbalom are the instruments most used. The cimbalom was used by the Hungarians for the proper rendering of their music. It is used to accompany the violin. What the band is to our Negro, the cimbalom is to the Magyar."

In his essay on "Hungarian and Slav Music," Helen Waver says: "They know music not as an algebra of black dots and dashes, but simply as a means of expressing their deepest emotions."

Why Go to College

Good Education Increases Chances for Success 700 Times

There's a lot to be said on both sides of the college question. It is true that you can find college graduates in jail, and boys who have never seen the inside of a schoolhouse sitting in the seats of the mighty; but that isn't the rule. Dean Parrall of Kansas Agricultural College, says, and we have no reason to question his figures, that: "An American with no schooling at all has one chance in 150,000 of becoming eminent. With a high school training he has eighty-seven times as good a chance. With a college education he has 700 times as good a chance."

Going to college, for most boys, means a few years of hard study and penny-pinching, but if it increases the chances for success 700 times, you have the answer to the question. Why, shouldn't the boy go to college even if it involves some sacrifice on his own part and some on the part of his family?—From Farm Life.

Superannuation Scheme in Alberta

The new superannuation scheme of the Alberta Government, which has been in effect since July 1, has now advanced in actual operation to the point of passing on a list of 10 members of the civil service who have retired on either the annuity or lump payment plan, the latter applying in cases of less than 10 years in the service.

Under terms of the Superannuation Act, the minimum annuity is on the basis of \$20 per month.

Motor Trail Through Rockies

The Banff-Windermere motor road has been traversed for the first time. Recently the Chief Engineer, motored from Banff to Invermere in 7 hours, a distance of 104 miles. "This provides another link on the Canadian motor trail through the Rockies. Next year the entire highway will be completed, it is believed."

Ted Is a Glutton

In twenty-four hours Ted consumes an amount of food equal to four times the capacity of his stomach.

Mexico at one time included all land from Panama to Vancouver Island.

To Rid World of Scourge

Aims to Educate Public on Initial Stages of Cancer

Education of the public regarding the initial symptoms of cancer that it may be detected in its curable stage is the aim of the American Society for the Control of Cancer, which is concentrating its efforts on National Cancer Week. Cancer is the oldest disease of mankind, says a statement issued by the society. Descriptions of conditions now known to be cancer are found among the fragmentary records of ancient India and Persia. It was known to the Egyptians before the time of Moses and is distinctly mentioned in the Papyrus Ebers 1500 B.C., the statement says, which adds that Herodotus told of Democedes' cure of Alcibiades of Persia, King of Persia, of a cancer of the breast, 530 B.C., while Daniel was a captive in Babylon.

The public, generally, regards cancer as a new disease and with the object of thoroughly distinguishing all humans on this score and instructing them on detection of the scourge, the society is conducting a national cancer week.

Statistics prove that one woman in every eight, who is more than 40 years of age, dies of cancer, says the statement. Three times as many women as men die of this dread disease between the ages of 35 and 45 years. From that time on, the ratio is more nearly equal. All physicians and surgeons, who have made a particular study of cancerous growths, are in the opinion that cancer is curable if treated in its initial stages, before they extend to inaccessible regions. Another fact on which all are agreed is that it is neither hereditary nor contagious.

Curious Lake in Ireland

Any Substance Sunk in Its Waters Becomes Petrified

What is undoubtedly one of the most curious lakes in the world is to be found in Ireland. This lake has the power of petrifying any substance that may fall into it. Of course, the petrification is not absolute, but the substance is coated with a layer of stone, which is found dissolved in the lake, and the stone then hardens and forms a shell over the substance.

A well-known English cutlery firm heard of this and sent a man over to inspect it.

He selected several pieces of hard wood, which he sank with weights, and then marked the places with small nails.

A fortnight later he returned and took up two pieces of the wood, which he found to be partly petrified. Two weeks after he drew up the other pieces and found each piece to be as hard as flint.

The firm then made several experiments with the wood, and found that at a certain stage of petrification an excellent razor hone could be manufactured from it.

Value of Canadian Milling

In a recent statement made by Hon. J. A. Robb, Minister of Trade and Commerce, Canadian milling has first place in the manufacturing industries of Canada, with a production value running into \$250,000,000 annually. With the exception of about \$3,000,000 worth of stocks, bonds and securities, all the stock in this industry is held in Canada.

Dix—That's the fourth umbrella I've lost in six months.

Dix—Your overhead expenses must be terrible.

Owned in Common

Will Islanders Work on the Communistic Principles

There is no private ownership of property in the Fiji. If a man wishes anything from another he asks for it and, according to Fijian custom, his neighbor must give up—whether it be his suit—(the native might say, "that hangs from the waist") or spear.

Every Fijian is an industrious beggar. All work is done in common, and the result of the work divided equally among all. If a man's house has been burned he reports to his chief that he needs a new one, and the chief assigns a certain number of men to build it.

The tribal chief, theoretically owns no personal property. But he is considered to own the bodies of all members of his tribe and all their possessions. Formerly he had the power of life and death. Now, though the British have done away with this, he still controls his people's property and labor, and is their judge and administrator.

Flour In Making Watches

Use Dough for Holding Small Parts

Two barrels of flour are used every week in making watches at a well known factory, which turns out from 2,000 to 3,000 watches a week. Since a baker uses about three pounds of flour to five loaves of bread, it follows that for every watch the master uses the equivalent of almost a third of a loaf. The flour is made into dough, and the dough is used to handle screws, rivets and other small parts.

Each man in that part of the business has a lump of dough always at hand; and when he wants to examine a screw he takes the piece of dough on his thumb, turning it over, he has a good chance to look at it with his watchmaker's microscope. (eye-glass) Many of the screws are too minute to pick up easily with the fingers, and many more, though large enough to be picked up, would be so covered by the fingers or the forceps as to be almost hidden from sight.

Early Electric Light Bulbs

Were Constructed With the Point of the Bulb Upward

When Thomas A. Edison first produced light by electricity all of his lamps were constructed with the point of the bulb upward, as it occurred neither to Edison nor to the men who were associated with him that any light could be handled successfully unless the flame were allowed to ascend. Although Edison genius had succeeded in producing light by electricity, the inventor's every day familiarity with the common gas jet with its ascending flame blinded him for a time to the fact that his new light could be produced with the lamp in any position.

Thus were all of the early electric chandeliers constructed in such a way that the individual bulbs could be set upright in their sockets.

May Build Palace of Labor

The Bolshies are projecting a grand Palace of Labor in the heart of Moscow, with a central hall holding eight thousand people, and four smaller halls, while the Tower will be the highest in the world. To build this it will be necessary to pull down the famous Continental Hotel and Tasty Restaurant, and six blocks of houses. No doubt the preliminary part of the programme will be accomplished all right.

Shelter Belt Planting, Live Stock Profits And Successful Farming Measures

(By J. G. Rutherford)

Every experienced feeder knows, and every farmer should know, that stock will not thrive or lay on flesh when constantly exposed to the winter winds of our western prairies. On the other hand, it is well established that if afforded adequate protection from the winds, livestock can be profitably fed to a finish in the open, even in our coldest winter weather.

I am quite aware that this statement may be questioned by persons lacking actual experience, but definite proof of its truth is fortunately available from many different sources. Reference may be made to the work in this line carried on at the Brandon Experimental Farm (especially during the Superintendency of Mr. James Murray, now District Representative at Medicine Hat for the Alberta Department of Agriculture); to the experience covering many years of Messrs. R. J. Phil, of Moonshine, Saskatchewan; W. P. Puffer, of Lacombe, Alberta; Colonel Harry Mullins, of Winnipeg; Mr. Grayson, of Newdale, Manitoba; and many others too numerous to mention.

Leaving the barnyard, we come to the garden, and it is surely needless to say that on the bald-headed prairie a good windbreak is essential to the well-being of the garden.

Given shelter from the wind, and reasonable care, the gardens of the prairie provinces are as good as can be found anywhere. All the standard vegetables and small fruits flourish in abundance, while as for flowers, the old friendly favorites of one's childhood and the most modern varieties, as these are introduced, respond readily to the rich soil, the warm sun and the placid atmosphere of the oasis beside the shelter belt.

When properly laid out, trees also effectively prevent those vast accumulations of snow which, during the winter storms, often surround and even more or less completely cover farm buildings, thus not only saving much extra work, but allowing the yards to dry out much more quickly in the spring.

When endeavoring to acclimatize field corn in Western Saskatchewan and Alberta, where, owing to high altitudes, cool nights and battering winds, it was for long difficult to obtain home-grown seed, the water on one occasion fortunately planted a small field lying south of an excellent shelter belt of Manitoba Maple and Russian Willow. This corn did wonderfully well, producing 17½ tons to the acre, as against an average of somewhat less than 8 tons, when grown in the open.

Subsequent similar experiences led to my planting sunflowers in the corn field for shelter purposes, as the sunflower grows more rapidly than the corn, is less affected by winds and achieves, if of the right variety, a somewhat greater height. Four rows of sunflowers were planted to every twelve rows of corn; the prevailing winds being north and northwest, the rows ran east and west. The result was very interesting, the rows of corn immediately south of the sunflowers being practically equal to them in height, with each succeeding row markedly shorter until the next sunflower shelter was reached, when the same condition was again observable. In fact the whole corn crop presented a succession of southerly slopes.

divided by the strips of sunflowers.

It will be observed that without specially mentioning the fact we have not away from the buildings and into the open fields. There also the shelter belt is a most important factor, not only in protecting growing crops from unkind winds, as already indicated, but in preventing the fatal soil drifting, which, of recent years, has done such widespread and in many cases irreparable damage.

It is a much more serious and expensive undertaking to provide windbreaks for an entire farm than it is to plant the sheltering trees necessary to protect the immediate vicinity of the home buildings and gardens. Nevertheless, while other agencies may also be of value, it is Nature's safest and surest way of holding things down where they belong. On many southern prairie farms it is a pressing question today and will be all the more urgent one next year and after, as to whether the forest belt shall come or the farm shall go, either on the wings of the wind, or for what it will fetch, less the losses already gone.

Sorting Weeds From Wheat

New Machine That Is Said to Successfully Remove Weed Seeds

Weed seeds that comprise from two to 25 per cent of the total bulk of wheat as it is harvested, are now successfully removed by a machine developed by the United States Department of Agriculture.

The new machine, called a "recleaner," consists of 15 aluminum disks set 2½ inches apart on a shaft rotating at 60 revolutions a minute. Each disk is slotted with a large number of undercut pockets, that act as sorters. Three sizes of pockets are used for making the separation. In operation, the fine seeds are discharged into bags on one side of the machine and the cleaned wheat into bins or wagons.

In one lot, grain containing up to 25 per cent of weeds was passed into the machine, reappearing, as cleaned wheat, without visible traces of foreign grains.

Search For Missing Link

Expedition to Search Pacific to Hunt For Tribes of Wild Men

Captain Edward A. Sallisbury, scientist and explorer, is en route for the Malay Peninsula, where he will search for what has been termed in science "the missing link." Captain Sallisbury sailed from London to time to about a tribe of wild men in the jungles of the Malay Archipelago, who had short, vertical tails. More, the report said, their foreheads receded and their brows ridged protruded. After the manner of the prehistoric man of non-mythical pre-history. The object of the expedition is to investigate the source of these reports in an effort to find man in his most primitive form.

Russia a Scrap Heap

All Machinery Has Deteriorated Under Regime of Soviet

Stinnes and other German ironmen have concluded arrangements whereby Russia will furnish them with millions of tons of iron scrap. Russia can provide unlimited quantities of this material. In part it consists of out of date guns and other weapons, but rails, bridges, ships, locomotives and factory machinery, which were in good order at the time of the revolution, have deteriorated so much during the Soviet regime that they are useless except as raw material. Russia has become a gigantic scrap heap.

Age Not a Matter of Years

Age counts for much less than it did a generation ago. People do not submit so readily to the growing-old process. They are realizing more and more that youth is not a physical affair at all. The new psychology, which is quickly, but deeply, affecting human thought in many directions, is teaching man that healthy, happy, cheerful thinking, and useful interests in life go a long way towards preserving fitness and freshness of body and mind.—Cape Argus (B. Africa).

Didn't Have Useful Reason

"Mrs. White was late at church this morning," remarked one woman.

"Yes," returned the other, "I wonder why. She didn't have on anything new."—Boston Transcript.

You may hear the best with greater tranquility if you will reflect that the world's most vicious mosquitoes are found in the frozen north.

PICKING STRAWBERRIES IN WESTERN CANADA IN SEPTEMBER

The above crop shows a portion of the strawberry crop picked on the eighteenth of September, 1922, from a field of ever-bearing strawberries set

out by the Prairie Nurseries at Estevan, Saskatchewan. During the past season over \$1,000.00 worth of berries were sold from this plot and during the month of September over a dozen

crates of berries were picked. Although the blossoms had been frozen by an early frost the vines continued to bear and several more crates were picked the second week in October.

RELIANCE SCHOOL INK

- 1 The cheapest and most satisfactory way to buy ink for school use is in gallon jugs, or in kegs. Kegs are returnable at the price charged, while jugs may be refilled, ensuring against evaporation.
- 2 This means a saving to the board.

The Enterprise can supply Reliance Ink in kegs, jugs, or bottles, any quantity at the best prices.

KOREEN

HAIR RESTORER

FOR SALE AT ALL DRUG STORES

Fire This Morning

Fire at an early hour this morning completely gutted a building on Victoria street immediately adjoining the Blaimore Hardware building.

The origin of the fire is unknown. The building was owned by S. J. Sargent and was occupied by Kubie & Kibarek, Bour and feed merchants, and "Red" Passalacqua's refreshment parlor, both of whom are rather heavy losers.

Considerable damage was also done the windows in the east side of the building look severe, being burnt out and slight damage resulted to contents of rooms.

Fire Hazards of Soft Coal

Large quantities of soft coal are being stored by mercantile establishments and industries because of the fear of a fuel shortage during the winter. The danger of spontaneous combustion in this case is a serious fire hazard, and unusual care should be exercised by the owners of such properties. The hazard can be reduced by proper selection of the grades and sizes of soft coal, and the exercise of proper precautions in its handling and storage.

Where large quantities of soft coal are stored in the open it should be in separate piles, so that a fire starting will not spread through the entire supply, and the affected pile can be extinguished or moved. Where the coal is stored in basements the Fuel Administration suggests the following precautions.

- 1 Coal the size of a walnut or larger is well adapted for storing. Mine run, slack or screenings, or accidental fine coal and dust, are not suited for storage in a basement.
- 2 Never place coal near a pipe, against a hot furnace or any other hot surface.
- 3 Do not mix ashes with the coal, as there may be live coals in the ashes.
- 4 If coal must be wet down, wet only the portion that is to be used immediately.
- 5 It is very important that pieces of waste, oily rags, sticks, paper and other rubbish should not be mixed, or allowed to come in contact with the coal.
- 6 Special attention should be paid to the proper cleaning of flues and chimneys regularly.

THE PASS THIRTEEN YEARS AGO

(From Frank Paper, February, 1908)

Ola McFarland, daughter of the new manager of McLarena's mill, who has been ill of typhoid fever, has recovered and is visiting her aunt, Mrs. Daniel May, at Lille.

At a recent meeting of the Calgary board of trade, the question of endorsing the applications for two new railroads for southwestern Alberta was considered. One of these roads will extend from Macleod to the boundary and the other from Cowley to Calgary, the latter opening up large coal fields.

Charles Chestnut was in from the South Fork. He states that he has work well under way on the prospecting operations started recently on the Carbon Hill property and that two fine seams, one seven feet and the other ten feet in thickness, have been opened and the coal appears to be of very fine quality.

It is stated that the Breckenridge & Lund mine at Lundbreck has closed down awaiting improvement of the coal market. The Galbraith mine has closed down also.

The first issue of John's Paper, a new monthly, founded by Mr. John, until recently editor of the Fernie Free Press, is to hand. It came in the form of a sheet of red paper about four by six inches and folded

HILLCREST HAPPENINGS

(By Our Own Dear Felix)

W. Hutchinson and family paid a visit to the Mormon temple at Cardston on the 22nd.

Ed and Joe Royle were engaged at the dance in the L.O.O.F. hall at Bellevue on Friday night last.

Miss Katie Morgan, of Calgary, is at present paying a visit to the home of her parents, Mr. and Mrs. John Morgan, at Peaceful Valley.

The dance held at the Union hall on the 20th, in aid of W. Kolesy, who has had a terrible run of luck since his accident, was a decided success and about two hundred dollars will be handed over to Bill.

Ed. Royle and family, accompanied by Mrs. A. E. McCulloch, paid a visit to the Mormon temple at Cardston on the 15th. Owing to the snow, storm, they were unable to reach home until the following day.

On Saturday evening, the 21st, the installation of officers of the newly formed Turtle Mountain Lodge of the Knights of Pythias, took place in the school house, the officiating D. G. C. C. being Bro. John Griffith, of Coleman, assisted by Bro. Powers, of Calgary, and several of the Coleman brothers. The first act was the presentation of the P.C.C. jewels to Bros. Ed. Royle, E. Harris and D. Convery, after which the following officers were installed—G.C., H. McDonald; V.C.C., A. Blackley; Prolate D. Convery; M. of E., J. Calderwood; M. of A., A. Warriner; M. of R. & S., Percy Salt; M. of W. F. Jones; M. of A., Ed. Royle. After the ceremony a banquet was held, to which all present did justice. The rest of the evening was spent in singing and telling love stories. The new lodge starts out in good shape and bids fair to become successful. Bro. Griffith deserves every credit, as it is through his untiring efforts that the lodge has commenced. Every member of the new lodge intends to be a live wire, as wallflowers never move.

to a page of three by four. There is no printing on it, except the title and date, February 14th, and forms a unique valentine.

C. Weatherly, superintendent of Hillcrest mine, is leaving shortly for South America.

R. Steeves and A. Manuel are assembling the materials for the new stone and brick business block they intend erecting on Dominion avenue.

Professor Huston has inaugurated his night school. He has a good-sized class and the undertaking promises to be very successful.

It is stated that the long-standing controversy over the title to the ground comprising the Blaimore cemetery is about to be settled.

The Coleman hockey team played Fernie at Fernie last week for the Whalen cup. Two games were played, Fernie winning both.

A. B. MacDonald, candidate of the Liberal party in the next Dominion elections, visited The Pass during the week.

Mark Drumm disposed of another lot of first poultry during the week.

The summer passenger train schedule is expected to go into effect on April 1st. It will involve a number of changes on the Crow line, including an additional passenger train between Cranbrook and Medicine Hat. Altogether, the new schedule promises greater consideration for the public than has ever been the case in Alberta.

The Maple Leaf mine, three miles east of Frank, made its first shipment last week.

The preacher had been strolling about the links, and wishing to drive home a small moral lesson said mildly: "I notice that the players who get the lowest scores are not those who swear." "Why the hell should they?" demanded the ghastly golfer as he dug up more turf.

A. E. May, former postmaster of Edmonton and a prominent Alberta Oddfellow, has gone to Kansas City, where he will do special immigration work for the Dominion government.

Drastic action is likely to be taken soon to put a stop to the export of liquor.

Philip Fortier and family are moving to Blaimore from Cowley, having secured a lease of the Putnam house, 84th Blaimore, where they will be in a position to accommodate one or two roomers.

Rev. Dr. A. S. Tuttle will deliver his popular lecture on "Christ or Treachery" at the new Bellevue Community hall on the night of Monday, November 13th.

By the will of the late Clark Parker, who died in Pasadena on January 10th, the Oddfellows of that city will receive fifty thousand dollars.

The recent report of the Sovereign Grand Lodge of the I.O.O.F. shows a net increase in Rebekah membership for 1921 of 90,080.

OIL LIGHT BEATS ELECTRIC OR GAS BURNS 94% AIR

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U.S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe, burns 94 per cent. air and 6 per cent. common kerosene (cost-free).

The inventor, T. V. Johnson, 578 McDermott Ave., Winnipeg, is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

WORLD HAPPENINGS BRIEFLY TOLD

The Orient liner *Ophir*, 7,000 tons, in which the King, then Prince of Wales, made his Empire tour in 1901, has been towed from the Clyde to be broken up at Troon, Ayrshire.

The police have discovered in caverns inside the estate of the Duke of Arold, Palermo, Sicily, a gang of forgers who had printed more than a million bank notes, including U.S. dollars.

For driving to the common danger and not having an effective silencer on his motor-car, Victor Robert Dill, a visitor from London to the Isle of Wight, was fined £20 and his license suspended for six months.

Approximately 2,000 casualties are reported at Foo-Chow, capital of Fukien, as a result of an attack by the defeated National forces to take the city from which they had been driven by the invading troops of General Hsu Tung-Chi.

Republicans seized a steamer off Westport, in the County of Mayo, Ireland, and forced the crew to take the vessel to Newport, of the same county, a point held by the Republicans. There they unloaded 400 tons of flour and then allowed the ship to proceed to Liverpool.

Cheques of £20 each were presented at Bow Street Police Court recently to Police Constables Marsh, Stevens (who was on crutches owing to a bullet wound), Bush and Duff, who arrested the two men who murdered Field Marshal Sir Henry Wilson outside his home last summer.

Fifteen thousand bushels of the Western Canadian wheat crop were shipped over the right-of-way, some 15 freight cars were smashed and the track was torn up for several yards in a rear-end wreck at Balld, Ont., on the Canadian National Railway on Oct. 15. Members of both train crews escaped injury.

The Regulation of Names

Law in France Prevents Bestowal on Children of Frank Names
A new Norwegian law for preventing the bestowal of ridiculous names on children—a form of cruelty of which a considerable number of parents are guilty—was anticipated years ago in France. No French child may be given a name that does not occur in the official list of names drawn up for the purpose, but as that list comprises thirteen thousand items, the choice can hardly be considered untruly circumscribed. It is permitted also that any name, male or female, may be selected, irrespective of the sex of the child, and hundreds of French boys bear the name Mary. Such a law is still lacking in Canada. —Montreal-Gazette.

PANGS OF NEURALGIA

This Painful Trouble is Due to Poverty of the Blood
Neuralgia is one of the most painful maladies that afflicts humanity. The trouble is usually seated in the face or head, following the course of some nerve, but it attacks other parts of the body, sometimes extending to the spine and paralyzing the limbs. But whatever course it takes the pain is almost unbearable. Medical authorities agree that neuralgia is due to poverty of the blood—that the nerves are actually being starved. It is further agreed that the blood is purified and enriched the trouble will disappear. It is for this reason that Dr. Williams' Pink Pills have been so successful in treating neuralgia. The blood, which feeds the starved, aching nerves, thus brings relief to the sufferer, whose general health is also improved. "Proof of the value of these pills in cases of this kind is given by Mrs. M. Brown, R.R. No. 1, Wray, Ont., who says: 'I have taken Dr. Williams' Pink Pills and can recommend them as being the best medicine I know of for neuralgia. Two years ago I had an attack of this trouble in the neck and shoulder. The repeated attacks of the pain were of such frightful intensity that my life was almost unbearable. I consulted two doctors and took their medicine, but without relief. I had taken Dr. Williams' Pink Pills years ago, when they helped me wonderfully, and I decided to try them again. Before I had taken more than half a dozen boxes the pain had disappeared, and I have since enjoyed the best of health, thanks to Dr. Williams' Pink Pills.' You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Advice

Salesman—Pardon me, sir, I have an attachment for your typewriter.
Manager—Well, don't bother her during working hours.—Notre Dame Juggler.

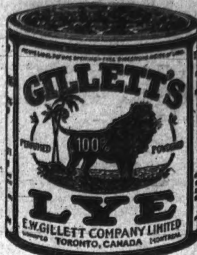

As a verminous effective preparation is Mother Graves' Worm Expeller, and it can be given to the most delicate child without fear of injury to the constitution.

Women and the Ministry

The discipline committee of the Methodist Church has reported against admitting women to the ministry, and, accordingly, in several years behind the legal and medical professions. Women will have to content themselves in future, as one bright Methodist woman writer has said, "in the humble task of paying off the church mortgages."—Calgary Alberta.

Minard's Liniment used by Physicians

A Diplomatic Doctor
Yours, physician.—In there any advice you can give me?
Elder Medic—Yes; before prescribing find out your patient's business. My first patient was the golf champion of the town and I advised him to take up this game for recreation.—Judge.

A Community Cow

Church in North Carolina Has Success With New Venture
Buying a cow and renting it at \$1 a week to families in the congregation is how the Church by the Side of the Road in Greensboro, N.C., is attempting to provide fresh milk for those who are unable to keep cows of their own. It is a new venture in church economics, but is apparently working out satisfactorily for both church and congregation. The income from the one cow is to be applied, we are told, to the purchase of more cows. Eventually, and if the plan is continued, the Church by the Side of the Road will have a community herd.—Literary Digest.

If Millers Worm Powders needed the support of testimonial they could be got from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that they can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

Manitoba Market Gardens

What it is hoped will result in great encouragement to the market garden industry in Manitoba is the organization and registration of the Manitoba Vegetable Growers' Association with a capital of \$100,000. The company will store and ship locally grown garden products offsetting the large waste which occurs each year and the many sales at quite unremunerative prices.

German engineers have estimated that the rivers and lakes of Southern Bavaria could be made to produce 200,000 hydro-electric horsepower.

An Oil without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Electric Oil, and there is no alcohol in it, so that its effects are lasting.

Milk Makes Molars

Mineral Matter and Vitamins Indispensable to Sound Teeth

Science is constantly discovering new and valuable data regarding the importance of milk as a food, but perhaps no recent development is more interesting than that which has come to light regarding the value of milk in the growth and maintenance of sound teeth.

It appears that if the mineral matter and vitamins, such as are found in milk, are not supplied liberally to the growing child, the jaw bone and teeth do not develop properly. Where the child has been deprived of milk, the teeth, not having proper support are of inferior character and do not last more than a few years. Mineral salts and vitamins such as found in milk and certain leafy vegetables, are indispensable to sound teeth in children.

A Privileged Character

Motorist Not Owing to Possess Skill And Judgment

An automobile has no rails, no black signals, no time schedule to regulate its speed. Except in the neighborhood of towns there is, for the most part, no authority that the driver fears. Yet a momentarily unsteady hand or careless eye may result in the death not only of the driver, but of the most careful wayfarer he encounters. The motorist, in brief, should possess many times the skill, judgment and stability of character required by the locomotive engineer; yet we permit anyone who can mount the driver's seat to inflict his incapacity upon the public.—New York Times.

MANY CHILDREN SICK, HOW TO TREAT THEM

The kiddies will get their feet wet, catch cold, get crup and give their mothers lots of trouble. With the first cough or sneeze, rub the little one's chest with Nerviline, rub it on plentifully. It can't harm. Then make a gargle with Nerviline and water, and have the child gargle for five minutes. Just at bed time, give the child ten drops of Nerviline in hot sweetened water. The result is fine, and next morning the child is better. Nerviline is a great protection in the home. Large 35c bottles at all dealers.

Estimates Canadian Wheat Yield

Canada's official estimate of wheat production for 1922, issued by the Dominion Bureau of Statistics and based on conditions at the end of August, was 38,773,000 bushels, as against 30,883,100 bushels last year. Subsequent estimates, it is believed, will tend to increase these figures considerably, as conditions in the wheat growing areas subsequent to Sept. 1 were very favorable to heavier yields.

Dye Old Skirt

Coat, Dress In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her worn, shabby dresses, skirts, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything, even if she has never dyed before. Buy "Diamond Dyes"—no other kind—then perfect home dyeing is sure because Diamond Dyes are guaranteed not to spot, fade, streak, or run. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton or mixed goods.

Aim Not Perfect

Waiter (to irate customer).—We aim to please.

Customer.—Then I'd advise a little target practice.—Washington and Lee Mink.

"Cascarets" 10c

For Sluggish Liver or Constipated Bowels

Clean your bowels! Feel fine! When you feel sick, dizzy, upset, when your head is dull or aching, or your stomach is sour or gassy, just take one or two Cascarets to relieve constipation. No griping—no laxative cathartic on earth for grown-ups and children. 10c a box. Taste like candy.

How Britain Acquired The Orkney Islands

Denmark's Pledge for Dowry of Princess Who Married Scottish King

The Orkney Islands, which are the possession of Great Britain, were not acquired by conquest nor were they ever ceded by treaty. They were simply transferred by Denmark to Scotland in 1468 in pledge for the payment of the dowry to the Princess of Denmark, who was married to James III, King of Scotland. In the deed of transfer, which is still in existence, it is specially mentioned that Denmark shall have the right to "redeem them at any future time by paying the original amount of the dowry with interest to date. There is little likelihood, however, that Denmark will ever attempt to exercise that right of redemption, because 50,000 Norwegians, the original amount of the dowry, would amount to perhaps a trillion of pounds sterling, and that is a bit more than the islands are worth.

The Better Plan
"Don't you think she should have her voice cultivated?"
"Yes, plowed under."

Pekin's streets, unlike those of most Chinese cities, are wide and straight.

Ask for Minard's and take no other

W. M. U. 1448

Fall Models Of Street Hats

At last smart turnout with vision. Next, small hat or ribbon. Narrow bands of braid ornament the third model, while band of fur turns trim of the tailored hat above.

Keep Minard's Liniment in the house

Aeroplane in Saskatchewan
Saskatchewan claims that her air pilots last year carried far more passengers and flew many more miles than those of any other province. During the year Saskatchewan fliers carried 3,625 passengers, 5,000 more than Manitoba the next highest, and 2,500 more than British Columbia. They flew 95,142 pilot miles as against 84,000 in Alberta, the next highest. An agitation is under way for the establishment in the province of a Government air station, because of this record.

Radium Production Shown
Radium worth \$20,000,000, but weighing only six ounces, has been produced in the last twenty-six years.

Calgary Citizen Gains Twenty-One Pounds

Alex. Hayman, a World War Veteran and well-known resident of 227 Fifth Ave., West, Calgary, Alberta, is still another who has found Tanlac a safe, sure road back to health, strength and working efficiency.

"I am not only feeling better than I have in years," says Mr. Hayman, "but I have actually gained twenty-one pounds and you may know by that what I think of Tanlac. My stomach and kidneys had been badly out of order for nearly four years and my appetite had deserted me entirely. Everything I would eat caused indigestion and as a result I lost twenty-five pounds in weight. I lost energy and strength until I just felt that each day would be the last I could stay on the job. At times my back was so lame and stiff that I could hardly raise myself up out of bed. The power of endurance had left me and I just seemed to be dead on my feet so to speak."

"But it only took Tanlac a few weeks to set me right and I am now feeling fine. I thoroughly enjoy my three square meals a day, for I have a wonderful appetite and everything agrees with me perfectly. To be in such good health after feeling miserable so long is certainly something to be thankful for and I cannot praise Tanlac too highly."

Tanlac is sold by all good druggists.

Turkish Settlement Pleases Moslems

It is understood that telegrams received in official quarters in London, indicate that an excellent effect has been produced on Moslem feeling among the Mohammedans in India, Persia and Afghanistan, as a result of the Near Eastern agreement.

BEAUTY OF THE SKIN
Is the natural desire of every woman and is obtained by the use of Dr. Chase's Ointment. Principles, blemishes, roughness, freckles, skin irritation and eczema disappear. The skin is soft, smooth and clear. All dealers or Richardson, Baker & Co., 112 King St. W., Toronto. Sample free if you mention this paper.

Dr. Chase's ointment

DOLLARS Gathering or growing this plant, I have sold it for \$24.00 per lb. Leaves wild, I grow it in my back yard on over two bushels each year. Send 10c for the plant and the seeds. Dr. Chase's ointment. 112 King St. W., Toronto.

The "Home Comfort" RANGE
Is now sold to the user direct from our factory. Thousands of these ranges in use over 30 years and still good ranges. Repairs for every home Comfort Range made since 1864 quickly supplied. The Wright's Tool Range Co. of Canada, Limited. 145 King St. W., Toronto.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Heavily "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing Co. and is the only name of Bayer Aspirin. While it is well known that Aspirin means Bayer manufacture, to avoid the public against confusion, the Bayer Aspirin boxes will be stamped with their general trade mark, the "Bayer Cross."

Local and General Items

For funeral flowers phone 212. Crow's Nest Pass Undertaking Co.

Watch for big ad next week. Something that will interest you.

Norman Huston is visiting for a few days with friends at Okotoks.

The town of Nanton will raise \$16,000 for the erection and equipment of a town hall building.

And an exchange remarks that if the United States congressmen voted as they drank; there would be no prohibition.

The scarlet fever epidemic, which a few weeks ago threatened us, has abated, and now only a few very mild cases remain.

It's getting so burned dry around here now that someone has suggested that the Hatfield method be adopted to satisfy our thirst.

Principal Asselstine, of Bellevue school, and Principal Powell, of the Coleman school, were visitors to The Pass metropolis on Saturday last.

Louis F. Swift, junior, son of the packer, and Mrs. Mary H. Bennett, a Pittsburg divorcee, eloped to Crown Point, Indiana, and were married by a judge.

M. B. Blackford, representing the Heintzman & Co., of Lethbridge, was in town on Tuesday. Mr. Blackford formerly represented Everalls stationery firm.

S. F. Wallace, former proprietor of the Fernie hotel, has been appointed a special constable in charge of prisoners engaged in outside work in the Fernie district.

About a dozen local Oddfellows motored to Michel on Friday night last, where they witnessed a degree conferred by the Fernie degree team and otherwise had a good time. They report that they had no difficulty passing through the "Pearly Gates."

William Wright, proprietor of a soft drinks counter at Coleman, was convicted of having beer of more than legal strength in his possession and last week paid a fine of \$150 and costs. Another Coleman offender against the Alberta Liquor Act was assessed \$125 and costs.

In a short time a railway snow plow will be needed to remove empty bottles from the road near Crow's Nest. Already the building of a new siding at Sentinel is being spoken of, where cars will be loaded with empties for the breweries and distilleries.

The service at the Union church on Sunday evening last took the form of a "Mothers and Daughters" service and was most impressive. The church was crowded to the doors while a choir of twenty-five girls occupied the rostrum. During the service, Mr. A. C. Fraser, of Nova Scotia, rendered two beautiful solos. Mr. Fraser is visiting friends in Coleman for a few weeks and very kindly consented to sing at last Sunday's service.

The chain at present used as a barrier against cars moving into Alberta from British Columbia, as a means of stopping them for the purpose of a search, is indeed dangerous to night or day traffic. To a person whose sight is not perfect the chain is, practically invisible and the red light itself to a stranger appears to be further away than it is. It is possible that some person may drive right up so that the chain would destroy the lights of the car or perhaps inflict more serious damage, and such damage might be averted if the chain were painted white.

The turkey trot has at last changed to a hesitation waltz.

Mrs. J. M. Carter has been a patient at the local hospital for the past week.

John Edward Brownlee, attorney-general of Alberta, has been appointed a king's counsel.

Mr. Asmussen was in town last week looking after repairs and installation of radio receiving sets.

Mrs. T. Barnes is relieving Mrs. Haines for a few days as matron of the miners' hospital at Coleman.

A great many of the temperance reformers of today would be drunkards if others would buy the booze for them.

Honest, it looks as though there'll never be any real peace on this earth till going to heaven is made compulsory.

The Robekahs are holding their Sale of Work and Tea at the Oddfellows hall this evening, and tonight a grand whist drive will take place.

The secretary of the Canadian Tuberculosis Association will visit Manitoba, Saskatchewan, Alberta and British Columbia in October and November.

The Chicago girl with two wooden legs, arrested recently for stealing silk stockings, probably only intended to draw a veil over her misfortunes.

As a Salvation Army officer was singing the opening chorus of an open-air meeting on Saturday evening last, "How Glad I Am," Porkey's prize ale dog raised his mug and sang "Oh, he's a jolly good fellow!"

A. G. Browning, deputy atorney-general, is paying his first visit to Blairmore today. Mr. Browning expresses himself as delighted with the general development and appearance of Blairmore.

John Barrett, proprietor of the "Owl" bar at Delia, was fined \$700 by Police Magistrate O'Connor at Drumheller for having liquor in his possession. Another charge for assaulting a police officer is still pending against Barrett.

Come in and see The Enterpriser samples and stock of Christmas Greeting Cards. You will find it much more satisfactory than waiting till nearer Christmas when the supply of the cards of your choice will have exhausted. We have scores of beautiful designs in stock and are agents for the best houses in Canada.

The Henry Ford won out in the fishing schooner race off the New England coast last week. Following is an interesting comparison between the Henry Ford and the Bluenose. Bluenose, length 142.1, beam 27 feet, draught 14.14, mainmast 81, mainboom 81, canvas 10,000 yards. Henry Ford, 138 feet long, beam 25.2, draught 15.7, mainmast 88 feet, mainboom 76 feet, canvas 9,504 yards.

This year there will be no need of sending out of town for your Christmas jewelry. Our local jeweler, Mr. S. Trono, has stocked in complete lines of the very finest in watches for ladies and gents, clocks, Delilah Pearl necklaces, gold nugget jewelry, gold pocket knives, silver jewelry, receipt or identification cards, diamond rings, Colonial design watches, French ivory ware, cut glassware, community sets, etc. Watch for ad before making purchases for the yuletide. Prices will be guaranteed to meet those of the mail order catalogue. Note the reduction in Victor double records, from 85c. to 75c.

The new Lyon Creek bridge will likely be opened to traffic next week.

Miss Doris Knappman is spending a few days with friends in Lethbridge.

A Halloween supper is to be held at the Mission hall on Tuesday evening next.

A meeting of the Alberta fair wage commission is being held today at the town hall.

Alberta radio receiving sets are now communicating with Chicago, Detroit and New York.

It is said that there are some well-to-do Scotchmen in Vancouver, and probably some hard to do.

Superintendent A. C. Bryan, of the A. P. Police Force, was in Blairmore yesterday in connection with an investigation into district police affairs.

The Lundbreck Golf Club will hold a dance in Tustian's hall at Cowley on the night of Friday, November the 17th. Watch for later announcements.

The Palm Cafe, Limited, will be moving into their commodious new premises early next week, and when squared away will have about the finest restaurant in southern Alberta.

We regret to learn that Mr. R. G. Vincent, formerly of Blairmore, is seriously ill at his home in West Coleman. Mr. Vincent has been suffering from an incurable malady for some time.

As a result of the investigation into troubles arising recently between municipal and provincial police officers, we understand that Chief Carter, of the local town police has tendered his resignation to the council and that same has been accepted, to become effective immediately.

"NATION BUILDERS"

Every person who joins the Red Cross at the time of the campaign to be held in Alberta during the week of November 5 to 11 will be helping to make Canadian citizens and to build a greater Canada. This is the fact that is emphasized in a twenty-four page pamphlet which has been issued by the Provincial Headquarters of the Society in Calgary.

Every person in Alberta should secure one of these booklets and learn for themselves just what the organization is doing. It points out the great work that is being done in the many different ways undertaken and any person cannot help but become interested in this Society if they will only take the trouble to make themselves acquainted with the work that is being carried on.

This booklet is being sent out to the Red Cross locals in all parts of the province and also to the campaign committees. The provincial branch would like to see every person have one, so if you are in a district where there is not a local of the society or where a committee has not been organized write to the provincial headquarters in the O'Sullivan Block, Calgary, and one will be sent you at once.

The work of the Society as a nation builder is outlined, and among the various other activities to be done are: immigration service, relief at home, relief abroad, our war legacy, the children's home at Brickburn, the disaster service, nursing and hospital service, health activities, the Junior Red Cross and the children's hospital.

"Here, boy," said the man to the boy who was helping him to drive a bunch of cattle, "hold this bull a minute, will you?" "No," answered the boy. "I don't mind being a director in this company, but I'm durned if I want to be a stockholder."

A grand masquerade dance is being held in the Union Hall at Hillcrest, on Friday evening, November 10th. Prizes will be offered for the best dressed lady and gent, best original and best comic costumes.

WORK ON COURTHOUSE TO START IMMEDIATELY

Supt. Bryan advises that the contract for the new courthouse has been let and that work of construction will start immediately.

We have been unable to ascertain who has the contract.

THE RED CROSS DRIVE

The Red Cross Membership and Finance Campaign will be held from the 5th to the 11th of November. The campaign this year will not be limited to the enrolment of members, but will be for the purpose of raising funds for both provincial and local work.

Owing to local conditions, our branch will not stage any active campaign, but it is earnestly requested that members and friends pay the small membership fee of one dollar without further solicitations. The lists are open at any time and dues may be paid to Mrs. J. M. Carter or Mrs. J. R. Smith.

TO ORGANIZE NIGHT CLASSES

A meeting held at the schoolhouse on Tuesday evening was addressed by Mr. Dingwall, of the Calgary Institute of Technology, in the interest of the formation of local night classes in mining, mathematics, dressmaking, bookkeeping and English, and it possible other subjects.

The meeting was poorly attended, so it was decided to advertise for a meeting to be held at the schoolhouse on Tuesday evening of next week at 8 o'clock.

Mr. Dingwall, however, informed those present of what the department of education was prepared to do in co-operation with the local board and that he has gone so far as to meet several citizens who might be interested, with the result that he had secured the assurance of assistance from Mrs. H. Gibeau as instructor in dressmaking, Miss Davis in English, Mr. Henderson in bookkeeping, Mr. Owen Morgan in mining and Mr. Conway in mathematics.

The meeting was informed by Mr. Crowder, mine inspector, that the first aid class would like to meet at the school and probably take up mathematics and mining subjects as well. Various views were expressed by those present and it was confidently anticipated that the organization of the various classes would take place following the meeting to be held on Tuesday night next.

In justice to the officers of the Alberta Provincial Police, we wish to state that in our reference to a red light district being established in The Pass we did not mean to infer that they had established a bawdy house. They are using a red light as a signal to passing autos to stop.

For Home Baking and Fresh Cakes go to The Palm Cafe, Blairmore. Orders also taken for any size wedding or birthday cakes. Agents for the Crows' Nest Bakery, Fernie, B.C.

L. DUTIL,

Chairman School Board.

I. O. O. F. DANCE

Bills will be out in a day or two announcing a grand dance to be given in the opera house on the night of Friday, November the 10th, under the auspices of the Crows' Nest Chapter, I.O.O.F. The proceeds are to go towards the fund being raised for the erection of a war memorial in Blairmore. A real good orchestra is being secured and a right good time is promised.

Rev. G. H. Cobblestick, former pastor of Wesley Methodist church, Lethbridge, but of late connected with St. Paul's church, Calgary, was killed near Calgary yesterday, when the car in which he was travelling became stalled on the street car line.

WONDERS NEVER CEASE

The wonderful success of the Family Herald and Weekly Star of Montreal has been more marked year by year continuously for half a century. There are households literally by tens of thousands all over Canada where the Family Herald has not only been a welcome weekly guest, but one indispensable to the home life. The success of the Family Herald of Montreal has been so conspicuous and so overwhelming that Publishers everywhere refer to it as the phenomenal journal. The price of subscription to it looks ridiculously small when the wonderful contents of the paper are considered. Those who do not know it can understand, have a sample copy free by writing to its Publishers, Montreal.

Under the Restaurant Act, G. B. Catonia, Tony Stella, Charles Stewart and Cesare Molina have had their provincial licenses cancelled.
